UNESCO science report

towards 2030

UNESCO Publishing There are fewer grounds today than in the past to deplore a North-South divide in research and innovation. This is one of the key findings of the UNESCO Science Report: towards 2030. A large number of countries are now incorporating science, technology and innovation in their national development agenda, in order to make their economies less reliant on raw materials and more rooted in knowledge. Most research and development (R&D) is taking place in high-income countries, but innovation of some kind is now occurring across the full spectrum of income levels according to the first survey of manufacturing companies in 65 countries conducted by the UNESCO Institute for Statistics and summarized in this report. For many lower-income countries, sustainable development has become an integral part of their national development plans for the next 10-20 years. Among higher-income countries, a firm commitment to sustainable development is often coupled with the desire to maintain competitiveness in global markets that are increasingly leaning towards 'green' technologies. The quest for clean energy and greater energy efficiency now figures among the research priorities of numerous countries. Written by more than 50 experts who are each covering the country or region from which they hail, the UNESCO Science Report: towards 2030 provides more country-level information than ever before. The trends and developments in science, technology and innovation policy and governance between 2009 and mid-2015 described here provide essential baseline information on the concerns and priorities of countries that could orient the implementation and drive the assessment of the 2030 Agenda for Sustainable Development in the years to come.

Planning Law and Practice in Northern Ireland

Taylor & Francis Each of the jurisdictions within the United Kingdom is constantly refining the operational characteristics of its planning system and while there are some common practices, there are also substantive divergences. In each territory the planning template is shaped within a dynamic political and legal context and thus students and practitioners require an accessible, in-depth and up-to-date literature dealing with this matter. The multi-disciplinary contributors to this expanded Second Edition of Planning Law and Practice in Northern Ireland explore the progression of planning within the region and discuss prominent facets of contemporary development management, development plans, environmental law, property law and professional practice. Consideration is given to the consequences of Brexit for planning in Northern Ireland, devolved government institutional structures for planning, and the post-2015 emergent performance of local authorities in this arena. The book makes an important contribution to the wider literature in this field and, with its extensive citing of statutes and cases, provides an essential resource for students, planning practitioners and researchers.

The 2030 Spike

Countdown to Global Catastrophe

Routledge The clock is relentlessly ticking! Our world teeters on a knife-edge between a peaceful and prosperous future for all, and a dark winter of death and destruction that threatens to smother the light of civilization. Within 30 years, in the 2030 decade, six powerful 'drivers' will converge with unprecedented force in a statistical spike that could tear humanity apart and plunge the world into a new Dark Age. Depleted fuel supplies, massive population growth, poverty, global climate change, famine, growing water shortages and international lawlessness are on a crash course with potentially catastrophic consequences. In the face of both doomsaying and denial over the state of our world, Colin Mason cuts through the rhetoric and reams of conflicting data to muster the evidence to illustrate a broad picture of the world as it is, and our possible futures. Ultimately his message is clear; we must act decisively, collectively and immediately to alter the trajectory of humanity away from catastrophe. Offering over 100 priorities for immediate action, The 2030 Spike serves as a guidebook for humanity through the treacherous minefields and wastelands ahead to a bright, peaceful and prosperous future in which all humans have the opportunity to thrive and build a better civilization. This book is powerful and essential reading for all people concerned with the future of humanity and planet earth.

The new AFCAT Guide with 10 past papers (2011 - 2016) 3rd Edition

Disha Publications The book "The new AFCAT Guide with 10 past papers (2011 - 2016)" has been written exclusively for the Air Force Common Admission Test, conducted by the Indian Air Force, strictly according to the latest exam pattern. The book has been prepared strictly according to the questions asked in the past 10 AFCAT tests held from 2011 to 2016. No other book in the market covers all the variety of questions as asked in the previous AFCAT tests. The Salient Features of the Book are: • The book covers the past 10 AFCAT papers held from 2011 to 2016. • The theory portion consists of 4 Comprehensive Sections on: General Awareness, Verbal Ability in English, Numerical Ability, Reasoning and Military Aptitude Test (including Spatial Reasoning). • Detailed theory along with solved examples and short-cuts to solve problems; • The Verbal Ability in English section also covers the Cloze Test as asked in the past exam. • The General Awareness section (thoroughly updated) covers questions on Current Affairs, Sports, Defence, History, Geography, General Politics, Basic Science, Arts & Culture etc. • The Reasoning and Military Aptitude section includes Verbal and Non-verbal Reasoning, Spatial Ability, Rotated Blocks, Hidden Figures etc.. • An exhaustive question bank has been provided at the end of each chapter in the form of an exercise. Solutions to the exercise have been provided at the end of each chapter.

Posthumanist Nomadisms across Non-Oedipal Spatiality

Vernon Press As an epistemological perspective, 'nomadism' is an emerging field of scholarship, offering intersectionality with eco-criticism, feminism, post-colonialism, migration studies, and translation. Much of the scholarship that uses the precepts of nomadism to read cultural texts and phenomena is scattered as separate articles in academic journals or as single chapters in books wherein the primary focus is the intersectional fields. Few book-length publications solely focus on the ramifications of nomadism; Posthumanist Nomadisms across non-Oedipal Spatiality fills that void. The fifteen chapters in this volume explore the possibilities offered by the nomadic perspective to explore a wide range of literary and cultural texts; organized into three sections, "Nomadic Assemblages," "Non-Oedipal Cartographies", and "Space-Time Montages", that work as one to negate absorption into the interiority of sovereign territory. These sections are not an attempt at corralling the nomadic spirit into separate enclosures; instead, they are bands of warriors that operate the violence of the hunted animal, dehumanized human others, and earth others. The chapters are in constant multi-vocal conversations with narratives that camp on the turbulent weathers of global transitory spaces. They charter real or intellectual turfs of interstitial/rhizomatic nomadic epistemologies as political resistance to the exclusionary practices of a violently wired world. This book will appeal to post-graduate students, researchers, and faculty in the departments of literature, comparative literary and cultural studies. Researchers in sociology, cultural anthropology, gender studies, and migration studies will also find the material applicable to the expanding approaches available in their fields.

Space Supporting Africa

Volume 2: Education and Healthcare as Priority Areas in Achieving the United Nations Sustainable Development Goals 2030

Springer Nature This book addresses the need to support decision-makers across Africa by promoting awareness of the importance of space technologies and data to African development through the presentation of existing examples where space supports education and healthcare, and by making recommendations for further roll-out of these efforts. This is necessary because of the enduring misconception that space-related research and expenditure competes with other, more pressing, needs on the continent, when in truth space can play a major role in meeting these needs. Accordingly, the book unpacks the United Nations Sustainable Development Goals (SDGs) 2030 and the critical needs they address in the African context. Secondly, it provides an analysis of the African higher education landscape and considers the network of higher education-related SDGs, their targets, and their indicators. Africa's own development plan, Agenda 2063, is also explored. The African higher education landscape is then assessed by way of three models - the Space-Education Equation (SEE), the Benefits to Education by Space Transection (BEST), and the Enhanced Education for Sustainable Development Access and Success (EESDAS) model. The critical role of educational technologies and e-learning in bridging the educational access and success gap is appraised, as is the role of the space sector, and its technologies, applications, and data in African higher education. Finally, it explores e-health and provides an analysis of pertinent technologies required by e-health, past and present, and the opportunities and challenges it presents. Space technology can play a critical role in eliminating the barriers that are currently preventing e-health from playing a more significant role in a developing region such as sub-Saharan Africa.

Strategic Management

Pearson UK Strategic Management is a core strategy textbook, covering all the major topics particularly from a global perspective. It delivers comprehensive coverage of the subject in an easy-to-read style with extensive examples and a range of free support material that will help you learn actively and effectively. This eighth edition of Strategic Management builds on proven strengths ... · over 70 short case studies to provide easily accessible illustrations of strategy in practice and additional cases available online to provide more in-depth examples of recent strategic decisions involving Sony, Apple and industry sectors · a continuous contrast between prescriptive and emergent views of strategy to highlight the key debates within the discipline · emphasis on practice throughout with features

to help you turn theory into practice · major international strategy cases from Europe, Africa, China, India, Middle East and the Americas · clear exploration of the key concepts · comprehensive, logical structure to guide you through this complex subject · Specialist chapters on public/third sector strategy, green strategy and sustainability, entrepreneurial strategy and international and global strategy New for the eighth edition: - Dynamic capabilities and resource renewal explored in a revised and updated chapter - Emergent strategy completely revised in two new chapters, one focusing on innovation, and technology and the other exploring knowledge and learning - New material on innovation and strategy in uncertain environments - Case studies from large and small organisations from Google, Spotify and Cadbury to Snapchat, Uber and green energy companies with 14 new cases and many cases updated This new edition also includes a wealth of free, online, open-access learning resources. Use these materials to enhance and test your knowledge to improve your grades. Online resources include web based cases with indicative answers, chapter based support material, long cases and multiple-choice questions. Richard Lynch is Emeritus Professor of Strategic Management at Middlesex University, London. He is an active researcher, lecturer and consultant, particularly in the area of global strategy and sustainable strategy.

Beyond Academic Learning First Results from the Survey of Social and Emotional Skills

First Results from the Survey of Social and Emotional Skills

OECD Publishing Over the last few years, social and emotional skills have been rising on the education policy agenda and in the public debate. Policy makers and education practitioners are seeking ways to complement the focus on academic learning, with attention to social and emotional skill development.

Global Environment Outlook - GEO-6: Healthy Planet, Healthy People

Cambridge University Press Published to coincide with the Fourth United Nations Environmental Assembly, UN Environment's sixth Global Environment Outlook calls on decision makers to take bold and urgent action to address pressing environmental issues in order to protect the planet and human health. By bringing together hundreds of scientists, peer reviewers and collaborating institutions and partners, the GEO reports build on sound scientific knowledge to provide governments, local authorities, businesses and individual citizens with the information needed to guide societies to a truly sustainable world by 2050. GEO-6 outlines the current state of the environment, illustrates possible future environmental trends and analyses the effectiveness of policies. This flagship report shows how governments can put us on the path to a truly sustainable future - emphasising that urgent and inclusive action is needed to achieve a healthy planet with healthy people. This title is also available as Open Access on Cambridge Core.

Advances in the Leading Paradigms of Urbanism and their Amalgamation

Compact Cities, Eco-Cities, and Data-Driven Smart Cities

Springer Nature This book explores the recent advances in the leading paradigms of urbanism, namely compact cities, eco-cities, and data-driven smart cities, and the evolving approach to their amalgamation under the umbrella term of smart sustainable cities. It addresses these advances by investigating how and to what extent the strategies of compact cities and eco-cities and their merger have been enhanced and strengthened through new planning and development practices, and are being supported and leveraged by the applied solutions pertaining to data-driven smart cities. The ultimate goal is to advance sustainability and harness its synergistic effects on multiple scales. This entails developing and implementing more effective approaches to the balanced integration of the three dimensions of sustainability, as well as to producing combined effects of the strategies and solutions of the prevailing approaches to urbanism that are greater than the sum of their separate effects in terms of the tripartite value of sustainability. Sustainable urban development is today seen as one of the keys towards unlocking the quest for a sustainable world. And the big data revolution is set to erupt in cities throughout the world, heralding an era where instrumentation, datafication, and computation are increasingly pervading the very fabric of cities and the spaces we live in thanks to the IoT. Big data and the IoT technologies are seen as powerful forces that have tremendous potential for advancing urban sustainability. Indeed, they are instigating a massive change in the way sustainable cities can tackle the kind of special conundrums, wicked problems, and significant challenges they inherently embody as complex systems. They offer a multitudinous array of innovative solutions and sophisticated approaches informed by groundbreaking research and data-driven science. As such, they are becoming essential to the functioning of sustainable cities. Besides, yet knowing to what extent we are making progress towards sustainable cities is problematic, adding to the fragmented, conflicting picture that arises of change on the ground in the face of the escalating rate and scale of urbanization and in the light of emerging ICT and its novel applications. In a nutshell, new circumstances require new responses. This timely and multifaceted book is intended for a wide

readership. As such, it will appeal to researchers, academics, urban scientists, urbanists, planners, designers, policy-makers, and futurists, as well as all readers interested in sustainable cities and their ongoing and future data-driven transformation.

Progress of the World's Women 2019

Families in a Changing World

United Nations The 2019 edition of Progress of the World's Women is an extensive assessment of the reality of families today. The report brings together global, regional and national data, and in-depth analysis about core issues of concern, including family laws, income and employment, unpaid care work, violence against women, and families and migration, among others. This landmark report proposes a comprehensive agenda for laws, economic and social policies, and public action to ensure gender equality within families and to accelerate women's rights and empowerment, which benefits us all.

Long March to Freedom

The True Story of a Colombian Kidnapping

Texas A&M University Press Running late for work one morning in September 1994, Tom Hargrove, communications director for an international agricultural aid organization in Cali, Colombia, was mildly annoyed when he spotted a roadblock, or retén, manned by soldiers in fatigues. He chafed at the delay, but told himself that guerrillas and kidnapers didn't operate on a main highway in broad daylight. But Hargrove had been dreadfully mistaken. Despite his assertions that he worked for a non-profit agricultural agency, he was forced at gunpoint into a vehicle and driven into the mountains by communist narco-terrorists who believed he was a valuable hostage. For almost a year, Hargrove was held by the guerillas and moved from one remote location to another. To maintain his grip on sanity, he recorded his daily experiences in makeshift journals: in a checkbook; on children's notebooks; and on scraps of paper scrounged during his ordeal. Hargrove's story, originally published in 1995, was the basis for the major motion picture Proof of Life, starring Russell Crowe and Meg Ryan. Now available again in paperback, Long March to Freedom chronicles one man's spirited determination to hang onto life and faith amid nearly impossible circumstances.

Global Health and Geographical Imaginaries

Taylor & Francis To date, geography has not yet carved out a disciplinary niche within the diffuse domain that constitutes global health. However, the compulsion to do and understand global health emerges largely from contexts that geography has long engaged with: urbanisation, globalisation, political economy, risk, vulnerability, lifestyles, geopolitics, culture, governance, development and the environment. Moreover, global health brings with it an innate, powerful and politicising spatial logic that is only now starting to emerge as an object of enquiry. This book aims to draw attention to and showcase the wealth of existing and emergent geographical contributions to what has recently been termed 'critical global health studies'. Geographical perspectives, this collection argues, are essential to bringing new and critical perspectives to bear on the inherent complexities and interconnectedness of global health problems and purported solutions. Thus, rather than rehearsing the frequent critique that global health is more a 'set of problems' than a coherent disciplinary approach to ameliorating the health of all and redressing global bio-inequalities; this collection seeks to explore what these problems might represent and the geographical imaginaries inherent in their constitution. This unique volume of geographical writings on global health not only deepens social scientific engagements with health itself, but in so doing, brings forth a series of new conceptual, methodological and empirical contributions to social scientific, multidisciplinary scholarship.
