The EU is the latest stage in a process of integration begun after World War II, initially by six Western European countries, to foster interdependence and make another war in Europe unthinkable. The EU currently consists of 28 member states, including most of the countries of Central and Eastern Europe, and has helped to promote peace, stability, and economic prosperity throughout the European continent. The EU has been built through a series of binding treaties. Over the years, EU member states have sought to harmonize laws and adopt common policies on an increasing number of economic, social, and political issues. EU member states share a customs union; a single market in which capital, goods, services, and people move freely; a common trade policy; and a common agricultural policy. Nineteen EU member states use a common currency (the euro), and 22 member states participate in the Schengen area of free movement in which internal border controls have been eliminated. In addition, the EU has been developing a Common Foreign and Security Policy (CFSP), which includes a Common Security and Defense Policy (CSDP), and pursuing cooperation in the area of Justice and Home Affairs (JHA) to forge common internal security measures. Member states work together through several EU institutions to set policy and to promote their collective interests. In recent years, however, the EU has faced a number of internal and external crises. Most notably, in a June 2016 public referendum, voters in the United Kingdom (UK) backed leaving the EU. The pending British exit from the EU (dubbed "Brexit") comes amid multiple other challenges, including the rise of populist and to some extent anti-EU political parties, concerns about democratic backsliding in some member states (including Poland and Hungary), ongoing pressures related to migration, a heightened terrorism threat, and a resurgent Russia. The United States has supported the European integration project since its inception in the 1950s as a means to prevent another catastrophic conflict on the European continent and foster democratic allies and strong trading partners. Today, the United States and the EU have a dynamic political partnership and share a huge trade and investment relationship. Despite periodic tensions in U.S.-EU relations over the years, U.S. and EU policymakers alike have viewed the partnership as serving both sides' overall strategic and economic interests. EU leaders are anxious about the Trump Administration's commitment to the EU project, the transatlantic partnership, and an open international trading system-especially amid the Administration's imposition of tariffs on EU steel and aluminum products since 2018 and the prospects of future auto tariffs. In July 2018, President Trump reportedly called the EU a "foe" on trade but the Administration subsequently sought to de-escalate U.S.-EU tensions and signaled its intention to launch new U.S.-EU trade negotiations. Concerns also linger in Brussels about the implications of the Trump Administration's "America First" foreign policy and its positions on a range of international issues, including Russia, Iran, the Israeli-Palestinian conflict, climate change, and the role of multilateral institutions. This report serves as a primer on the EU. Despite the UK's vote to leave the EU, the UK remains a full member of the bloc until it officially exits the EU (which is scheduled to occur by October 31, 2019, but may be further delayed). As such, this report largely addresses the EU and its institutions as they currently exist. It also briefly describes U.S.-EU political and economic relations that may be of interest. **The Life and Teachings of Mohammed Or, The Spirit of Islam** **Document-Based Assessment for Global History High School** [Walch Education](#) Enhances the world history curriculum through analysis of primary and secondary sources. John L. Esposito, Editor-in-Chief of the four-volume Oxford Encyclopedia of the Modern Islamic World, has gathered together sixteen leading scholars, both Muslim and non-Muslim, to examine the origins and historical development of Islam—its faith, community, institutions,

sciences, and arts. Beginning in the pre-Islamic Arab world, the chapters range from the story of Muhammad and his Companions, to the development of Islamic religion and culture and the empires that grew from it, to the influence that Islam has on today's world. The book covers a wide array of subjects, casting light on topics such as the historical encounter of Islam and Christianity, the role of Islam in the Mughal and Ottoman empires, the growth of Islam in Southeast Asia, China, and Africa, the political, economic, and religious challenges of European imperialism in the nineteenth and twentieth centuries, and Islamic communities in the modern Western world. In addition, the book offers excellent articles on Islamic religion, art and architecture, and sciences as well as bibliographies. Events in the contemporary world have led to an explosion of interest and scholarly work on Islam. Written for the general reader but also appealing to specialists, *The Oxford History of Islam* offers the best of that recent scholarship, presented in a readable style and complemented by a rich variety of illustrations. **A Treatise on the Small-pox and Measles** Translated from the original Arabic by William Alexander Greenhill. **Cracking the AP World History Exam 2017, Premium Edition** Princeton Review PREMIUM PRACTICE FOR A PERFECT 5! In no other field has the revolt of modern Western thought against traditional philosophy been so far-reaching in its consequences as in the field of history. Ibn Khaldun realized that history is more immediately related to action than political philosophy because it studies the actual state of man and society. He found that the ancients had not made history the object of an independent science, and thought it was important to fill this gap. A factual acquaintance with the conclusions of Ibn Khaldun's reflections on history is not the same as the full comprehension of their theoretical significance. When these fundamental questions are answered, it becomes possible to pose the specific question of the relation of Ibn Khaldun's philosophy of history, or his new science of culture, to other practical sciences and, particularly, to the art of history. After an exposition of the major trends of Islamic historiography, part of this book attempts to answer this question through the analysis of the method and intention of the sections of the 'History' where Ibn Khaldun himself examines the works of major Muslim historians, shows the necessity of the new science of culture, and distinguishes it from other practical sciences. **Gilgamesh Epic and Old Testament Parallels** University of Chicago Press Cuneiform records made some three thousand years ago are the basis for this essay on the ideas of death and the afterlife and the story of the flood which were current among the ancient peoples of the Tigris-Euphrates Valley. With the same careful scholarship shown in his previous volume, *The Babylonian Genesis*, Heidel interprets the famous Gilgamesh Epic and other related Babylonian and Assyrian documents. He compares them with corresponding portions of the Old Testament in order to determine the inherent historical relationship of Hebrew and Mesopotamian ideas. **Toward the African Revolution Political Essays** Grove Press Political essays, articles, and notes written between 1952 and 1961. **Crimes Against Humanity and Civilization The Genocide of the Armenians** Facing History & Ourselves National Foundation, Incorporated **Princeton Review AP Biology Premium Prep, 2021 6 Practice Tests + Complete Content Review + Strategies & Techniques** Princeton Review Make sure you're studying with the most up-to-date prep materials! (PRODUCT ID 23958336). Time in Early Modern Islam Calendar, Ceremony, and Chronology in the Safavid, Mughal and Ottoman Empires** Cambridge University Press The prophet Muhammad and the early Islamic community radically redefined the concept of time that they had inherited from earlier religions' beliefs and practices. This new temporal system, based on a lunar calendar and era, was complex and required sophistication and accuracy. From the ninth to the sixteenth centuries, it was the Muslim astronomers of the Ottoman, Safavid and Mughal empires who were responsible for the major advances in mathematics, astronomy and astrology. This fascinating study compares the Islamic concept of time, and its historical and cultural significance, across these three great empires. Each empire, while mindful of earlier models, created a new temporal system, fashioning a new solar calendar and era and a new round of rituals and ceremonies from the cultural resources at hand. This book contributes to our understanding of the Muslim temporal system and our appreciation of the influence of Islamic science on the Western world. **Some Aspects of Islamic Culture Reading Like a Historian Teaching Literacy in Middle and High School History**

Classrooms Teachers College Press This practical resource shows you how to apply Sam Wineburg's highly acclaimed approach to teaching, "Reading Like a Historian," in your middle and high school classroom to increase academic literacy and spark students' curiosity. Chapters cover key moments in American history, beginning with exploration and colonization and ending with the Cuban Missile Crisis. **World Civilizations The Global Experience** Longman Publishing Group With 83 additional outline and four-color maps, *World Civilizations: The Global Experience, Fifth Edition, Atlas Edition*, helps students with geography, one of the most difficult aspects of World history courses for many. The maps are accompanied by review questions that call on students to identify important geographical areas and think critically about the connection between geography and historical events. The maps are on perforated pages and are organized by chapter so that they can be assigned easily and collected. The primary goal of *World Civilizations* is to present a truly global history—since the development of agriculture and herding to the present. Using a unique periodization, this book divides the main periods of human history according to changes in the nature and extent of global contacts. This global world history text emphasizes the major stages in the interactions among different peoples and societies, while also assessing the development of major societies. Presenting social and cultural as well as political and economic aspects, the book examines key civilizations in world history. *World Civilizations* balances this discussion of independent developments in the world's major civilizations with comparative analysis of the results of global contact. **Staying Put Making a Home in a Restless World** Beacon Press (MA) Drawing on his own experiences, the author presents essays discussing the necessity of making a commitment to one place in a society that values rootlessness. **Useful Enemies Islam and the Ottoman Empire in Western Political Thought, 1450-1750** Oxford University Press, USA From the fall of Constantinople in 1453 until the eighteenth century, many Western European writers viewed the Ottoman Empire with almost obsessive interest. Typically they reacted to it with fear and distrust; and such feelings were reinforced by the deep hostility of Western Christendom towards Islam. Yet there was also much curiosity about the social and political system on which the huge power of the sultans was based. In the sixteenth century, especially, when Ottoman territorial expansion was rapid and Ottoman institutions seemed particularly robust, there was even open admiration. In this path-breaking book Noel Malcolm ranges through these vital centuries of East-West interaction, studying all the ways in which thinkers in the West interpreted the Ottoman Empire as a political phenomenon - and Islam as a political religion. *Useful Enemies* shows how the concept of 'oriental despotism' began as an attempt to turn the tables on a very positive analysis of Ottoman state power, and how, as it developed, it interacted with Western debates about monarchy and government. Noel Malcolm also shows how a negative portrayal of Islam as a religion devised for political purposes was assimilated by radical writers, who extended the criticism to all religions, including Christianity itself. Examining the works of many famous thinkers (including Machiavelli, Bodin, and Montesquieu) and many less well-known ones, *Useful Enemies* illuminates the long-term development of Western ideas about the Ottomans, and about Islam. Noel Malcolm shows how these ideas became intertwined with internal Western debates about power, religion, society, and war. Discussions of Islam and the Ottoman Empire were thus bound up with mainstream thinking in the West on a wide range of important topics. These Eastern enemies were not just there to be denounced. They were there to be made use of, in arguments which contributed significantly to the development of Western political thought. **The Haitian Revolution** Verso Books Toussaint L'Ouverture was the leader of the Haitian Revolution in the late eighteenth century, in which slaves rebelled against their masters and established the first black republic. In this collection of his writings and speeches, former Haitian politician Jean-Bertrand Aristide demonstrates L'Ouverture's profound contribution to the struggle for equality. **Traditions & Encounters: A Global Perspective on the Past** McGraw-Hill Education *Traditions & Encounters* offers an inclusive vision of the global past—one that is meaningful and appropriate for the interdependent world of contemporary times. Given the diversity of human societies, gathering and organizing the sheer mass of information in a meaningful way is a daunting challenge for any world history survey course. The seven-part chronological organization enables students to understand the development of the world through time, while also exploring broader, big-picture thematic issues in world history. Through new and revised chapter-level and part-level features, the hallmark twin themes of traditions and encounters emerge in greater clarity than ever before in this sixth edition. As a result, students have resources that enable them to move beyond the facts of history and examine the past critically, analyze causes and effects, and recognize similarities and differences across world regions and time periods. By digging deeper into the implications of world history's stories—not just the who, the what, and the where, but also the why and the how—students can make sense of the human past. *Connect* is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need, when they need it, and how they need it, so that your class time is more engaging and effective. **Peterson's AP European History** Peterson's Science as a Gateway to Understanding International Workshop Proceedings, Tehran, Iran National Academies Press In October 2007, the U.S. National Academies and the Iranian Institute for Advanced Studies in Basic Science organized the first of a series of planned U.S.-Iranian workshops on the topic "Science as a Gateway to Understanding." This new workshop series is a component of the broader effort of the National Academies to support bilateral workshops and exchange visits in a variety of fields with a number of Iranian institutions that began in 2000. This book includes papers that were presented at the workshop and summaries of the discussions that followed some of the presentations. At the conclusion of the workshop there was general agreement that the presentations on many aspects of science and scientific cooperation that have a bearing on mutual understanding were an important first step. Several participants underscored that the next workshop should emphasize how scientific cooperation can lead in concrete terms to improved understanding among both academic and political leaders from the two countries. **Tacitus, Annals, 15.20-23, 33-45 Latin Text, Study Aids with Vocabulary, and Commentary** Open Book Publishers The emperor Nero is etched into the Western imagination as one of ancient Rome's most infamous villains, and Tacitus' *Annals* have played a central role in shaping the mainstream historiographical understanding of this flamboyant autocrat. This section of the text plunges us straight into the moral cesspool that Rome had apparently become in the later years of Nero's reign, chronicling the emperor's fledgling stage career including his plans for a grand tour of Greece; his participation in a city-wide orgy climaxing in his publicly consummated 'marriage' to his toy boy Pythagoras; the great fire of AD 64, during which large parts of central Rome went up in flames; and the rising of Nero's 'grotesque' new palace, the so-called 'Golden House', from the ashes of the city. This building project stoked the rumours that the emperor himself was behind the conflagration, and Tacitus goes on to present us with Nero's gruesome efforts to quell these mutterings by

scapegoating and executing members of an unpopular new cult then starting to spread through the Roman empire: Christianity. All this contrasts starkly with four chapters focusing on one of Nero's most principled opponents, the Stoic senator Thrasea Paetus, an audacious figure of moral fibre, who courageously refuses to bend to the forces of imperial corruption and hypocrisy. This course book offers a portion of the original Latin text, study aids with vocabulary, and a commentary. Designed to stretch and stimulate readers, Owen's and Gildenhard's incisive commentary will be of particular interest to students of Latin at both A2 and undergraduate level. It extends beyond detailed linguistic analysis and historical background to encourage critical engagement with Tacitus' prose and discussion of the most recent scholarly thought.

The Decision to Drop the Atomic Bomb *Greenwood Publishing Group* This book is a balanced account of the political, diplomatic, and military currents that influenced Japan's attempts to surrender and the United States's decision to drop the atomic bombs. Based on extensive research in both the United States and Japan, this book allows the reader to follow the parallel decision-making in Tokyo and Washington that contributed to lost opportunities that might have allowed a less brutal conclusion to the war. Topics discussed and analyzed include Japan's desperate military situation; its decision to look to the Soviet Union to mediate the conflict; the Manhattan Project; the debates within Truman's Administration and the armed forces as to whether to modify unconditional surrender terms to include retention of Emperor Hirohito and whether to plan for the invasion of Japan's home islands or to rely instead on blockade and bombing to force the surrender.

A False Tree of Liberty Human Rights in Radical Thought *Oxford University Press, USA* This book is concerned with the history of the idea of human rights. It offers a fresh approach that puts aside familiar questions such as 'Where do human rights come from?' and 'When did human rights begin?' for the sake of looking into connections between debates about the rights of man and developments within the history of capitalism. The focus is on England, where, at the end of the eighteenth century, a heated controversy over the rights of man coincided with the final enclosure of common lands and the momentous changes associated with early industrialisation. Tracking back still further to sixteenth- and seventeenth-century writing about dispossession, resistance and rights, the book reveals a forgotten tradition of thought about central issues in human rights, with profound implications for their prospects in the world today.

The Black Death in the Middle East *Princeton University Press* In this book the author uses primarily Arabic sources to discuss the transmission of the Black Death to the Middle East and the devastation the disease caused on the society and economics in Egypt and Syria.

Historical Thinking and Other Unnatural Acts Charting the Future of Teaching the Past *Critical Perspectives on the P* Whether he is comparing how students and historians interpret documentary evidence or analyzing children's drawings, Wineburg's essays offer rough maps of how ordinary people think about the past and use it to understand the present. These essays acknowledge the role of collective memory in filtering what we learn in school and shaping our historical thinking.

History of Mehmed the Conqueror *Princeton University Press* Five hundred years ago the great walled city of Constantinople fell under the relentless siege of the Ottoman Turks led by Sultan Mehmed II, Mehmed the Conqueror. Kristovoulos, one of the vanquished Greeks, later entered into the service of the Conqueror and began to write a history of the Sultan's life, starting with the year 1451, the beginning of Mehmed's 31-year reign. Death apparently prevented Kristovoulos from completing his account, but the manuscript covering the first seventeen years has been preserved and this exciting chronicle is here translated into English for the first time. Charles T. Riggs, who died in February 1953 at Robert College in modern Istanbul, was a missionary in the Near East. Originally published in 1954. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. History of the Arabs, Revised 10th Edition *Palgrave Macmillan* This authoritative study of the Arabians and the Arabic-speaking peoples is a valuable source of information on Arab history. Suitable for both scholars and the general reader, it unrolls one of the richest and most instructive panoramas in history, telling with insight the story of the rise of Islam in the Middle Ages, its conquests, its empire, its time of greatness and of decay.
