ACLS

PEARLS OF WISDOM

Boston Medical Pub Incorporated This book was specially designed to help you to pass the Advanced Cardiac Life Support Course of the American Heart Association. The format differs from all other review and test preparation texts. The text is written in rapid-fire, question/answer format. The student receives immediate gratification with a correct answer only. The text is designed to maximise your score on a test. Additional hooks are often attached to the answer in various forms, including mnemonics, evoked visual imagery, repetition and humour. Additional information not requested in the question may be included in the answer. The same information is often sought in several different questions. Emphasis has been placed on evoking both trivia and key facts that are easily overlooked, are quickly forgotten, and yet somehow always seem to appear on ACLS exams.

COMPREHENSIVE HEALTHCARE SIMULATION: MASTERY LEARNING IN HEALTH PROFESSIONS EDUCATION

Springer Nature This book presents the parameters of Mastery Learning (ML), an especially stringent variety of competency-based education that guides students to acquire essential knowledge and skill, measured rigorously against a minimum passing standard (MPS). As both a scholarly resource and a teaching tool, this is a "how to" book that serves as a resource for a wide variety of health professions educators. A seminal source of information and practical advice about ML, this book divided into five parts: Clinical Education in the Health Professions, The Mastery Learning Model, Mastery Learning in Action, Transfer of Training from Mastery Learning and The Road Ahead. Complete with high-quality images and tables, chapters take an in-depth look into ML principles and practices across the health professions. Specific educational content instructs readers on how to build and present ML curricula, evaluate short and long-run results, conduct learner debriefing and give powerful feedback, set learner achievement standards, and prepare faculty for new educational roles. An invaluable addition to the Comprehensive Healthcare Simulation Series, Mastery Learning in Health Professions Education is written and edited by leaders in the field for practicing clinicians in a variety of health

professions.

COMPREHENSIVE HEALTHCARE SIMULATION: EMERGENCY MEDICINE

Springer Nature This is a practical guide to the use of simulation in emergency medicine training and evaluation. It covers scenario building, debriefing, and feedback, and it discusses the use of simulation for different purposes, including education, crisis resource management and interdisciplinary team training. Divided into five sections, the book begins with the historical foundations of emergency medicine, as well as education and learning theory. In order to effectively relay different simulation modalities and technologies, subsequent chapters feature an extensive number of practical scenarios to allow readers to build a curriculum. These simulations include pediatric emergency medicine, trauma, disaster medicine, and ultrasound. Chapters are also organized to meet the needs of readers who are in different stages of their education, ranging from undergraduate students to medical directors. The book then concludes with a discussion on the future and projected developments of simulation training. *Comprehensive Healthcare Simulation: Emergency Medicine* is an invaluable resource for a variety of learners, from medical students, residents, and practicing emergency physicians to emergency medical technicians, and health-related professionals.

CARDIOVASCULAR AND PULMONARY PHYSICAL THERAPY - E-BOOK

EVIDENCE TO PRACTICE

Elsevier Health Sciences Providing a solid foundation in cardiovascular and pulmonary physiology and rehabilitation, *Cardiovascular and Pulmonary Physical Therapy: Evidence and Practice, 5th Edition* uses the latest scientific literature and research in covering anatomy and physiology, assessment, and interventions. A holistic approach addresses the full spectrum of cardiovascular and pulmonary physical therapy from acute to chronic conditions, starting with care of the stable patient and progressing to management of the more complex, unstable patient. Both primary and secondary cardiovascular and pulmonary disorders are covered. In this edition, updates include new, full-color clinical photographs and the most current coverage of techniques and trends in cardiopulmonary physical therapy. Edited by Donna Frownfelter and Elizabeth Dean, recognized leaders in cardiovascular and pulmonary rehabilitation, this resource is ideal for clinicals and for practice. Evidence-based practice is demonstrated with case studies, and the latest research supports PT decision-making. Real-life clinical cases show the application of concepts to evidence-based practice. Holistic approach supports treating the whole person rather than just the symptoms of a disease or disorder, covering medical,

physiological, psychological, psychosocial, therapeutic, practical, and methodological aspects. Coverage includes both primary and secondary cardiovascular and pulmonary conditions. An integrated approach to oxygen transport demonstrates how the cardiovascular and pulmonary systems function together. Emphasis on the terminology and guidelines of APTA's Guide to Physical Therapist Practice keeps the book consistent with the standards for practice in physical therapy. Key terms and review questions in each chapter focus your learning on important concepts. The Evolve companion website includes additional resources such as a case study guide, Archie animations, color images, video clips, WebLinks, and references with links to MEDLINE abstracts. Full-color photos and illustrations enhance your understanding of the book's concepts. Two new Mobilization and Exercise chapters cover physiologic principles along with application to practice. Information on airway clearance techniques is revised and condensed into one comprehensive chapter. New reference style makes it easier to find resources by replacing the old author-date references with numbered superscripts linked to MEDLINE abstracts.
