The Effect of Living Backwards

Penguin Following her acclaimed debut, *The Mineral Palace*, Heidi Julavits presents a quirky, compelling novel about two sisters, a bizarre event, and the elusive nature of truth—a *New York Times* Notable Book. Does Alice really hate her sister, or is that love? Was she really enrolled in grad school, or was that an elaborate hoax? Is this really a hijacking, or is it merely the effect of living backwards? “Heidi Julavits—no stranger to edgy, dark topics—takes liberties with conventional notions of hijacking and hostages, weaving humor in a zingy and brainy spectrum...If you can take successive shots of wit with gulps of moral inquisition, then this fine book is for you.”—*Milwaukee Journal Sentinel*

The Grace Effect

How the Power of One Life Can Reverse the Corruption of Unbelief

Thomas Nelson Inc "Simply defined, the 'grace effect' is an observable phenomenon—that life is demonstrably better where authentic Christianity flourishes." What does Christianity give us beyond televangelists, potlucks, and bad basketball leagues? Not much, according to the secular Left. The world, they say, would be a better place without it. Historian and Christian apologist Larry Taunton has spent much of his career refuting just this sort of thinking, but when he encounters Sasha, a golden-haired Ukrainian orphan girl whose life has been shaped by atheistic theorists, he discovers an unlikely champion for the transforming power of grace. Through the narrative of Sasha's redemption, we see the false promises of socialism; the soul-destroying influence of unbelief; and how a society cultivates its own demise when it rejects the ultimate source of grace. We see, in short, the kind of world the atheists would give us: a world without Christianity—cold, pitiless, and graceless. And yet, as Sasha shows us, it is a world that is not beyond the healing power of "the grace effect." Occasionally infuriating, often amusing, but always inspiring, *The Grace Effect* will have you cheering for the courageous little girl who shamed the academic elitists of our day. "This highly readable book is a collection of powerful insights into the long-term consequences of spiritual indifference and, above all, a remarkable example of how to conquer it." - Dr. Olivera Petrovich, research psychologist, University of Oxford "What would a world without Christianity look like? We don't have to guess because such a world does exist: it exists in the current and former Communist bloc. Through the inspiring story of a little girl born in Eastern Europe and now living in America, Larry Taunton draws a sharp contrast between the life-giving influence of Christianity and the worn out theories of atheism and radical secularism. The effect--The Grace Effect--is nothing less than powerful and moving." -- Dinesh D'Souza, former White House policy analyst, fellow of the Hoover Institute at Stanford University, and current president of Kings College

The Backward-Flowing Method

The Secret of Life and Death

Life Force Books For the first time ever, a book dares to reveal the secrets of the worlds most influential meditation method, a series of techniques originally compiled in the 9th. Century masterpiece of Chinese alchemy, *The Secret of the Golden Flower*. The author, JJ Semple shares his many years of first-hand practice with the sacred books meditation system. One-by-one, he reveals the techniques behind the books secrets, providing clear instructions on how to use them. Not even Richard Wilhelm, the translator, or Carl Gustav Jung, the famous psychologist, who wrote the original commentary to *The Secret of the Golden Flower*, were able to plumb the depths of this method. This book is an extraordinary statement about the inevitability of karma and the obstacles one must overcome in the quest for self-realization.

Traveling Backward

Curious Journeys and Quixotic Quests Beyond The Youth of Old Age

Xlibris Corporation TRAVELING BACKWARD is a highly original philosophic romp beyond the youth of old age with a quixotic 'journalist turned mom turned academic turned peasant.' It's a kind of light-hearted guide to the wisdom of the ages—from Socrates to existentialism and beyond—gleaned during a struggle to recover the images that first touched her heart and to answer two questions: Who am I really? Where does the world come from? It's a colorful, occasionally poignant, journey that could help you look at life through the reverent eyes of a child again. GLIMPSES OF 'TRAVELING BACKWARD': "You two remind me of Peter Pan. Trouble is, I'm not sure which one of you is Peter Pan. Well, I was taken aback. But my mate took action. Muttering something negative about fairy stories, he headed for the door and disappeared down the hall. I started to follow him but changed my mind. Instead, I headed for the public library to reread Peter Pan. Had I missed something?" (Elayne Wareing Fitzpatrick) "Human life - indeed all life - is poetry. It's we who live it, unconsciously, day by day. . . Yet in its inviolable wholeness it lives us, it composes us. . . We are works of art, but we are not the artist. . . Dare everything, need nothing." (Lou Andreas—Salome) "I relate to [Andreas—Salome's] passionate struggle for truth, to her ultimate reverence for all life, and to her desire to enjoy intellectual friendships with a variety of men, free of sexual overtones." (Fitzpatrick) "I was discovering that, deep down, I didn't really 'take' to popular culture, crowds, and bustling cities, regardless of my curiosity, regardless of my journalist's delight in writing about all of it." (Fitzpatrick) "If you can't change the world, change worlds." (St. Francis of Assisi) "If I were ever to choose a place away from my country, it would surely be a

Greek island, outside Athens. . . In Greece, I feel completely at home. Maybe that's because, as the poet Shelley said, 'We're all Greeks. Our laws, our literature, our religion, our arts have their roots in Greece.' (Fitzpatrick) "Back straight and head held high, he would place his left arm on my right shoulder, snap his fingers and lead me in the graceful, deliberate movements of the Zorba dance, accompanied by a recording of Mozart's 40th played on the bouzouki. This against a backdrop of tinkling goat bells and singing monks gathered in a distant church." (Fitzpatrick) "Many of the highs and lows in my life. . . have resulted from conflict born of the struggle between my own strong loving, nesting needs and my equally strong needs for freedom to think, to adventure, to discover, to express myself." (Fitzpatrick) "All parts of this one organic whole – this one God – are different expressions of the same energy, and they are all in communication with each other, influencing each other, therefore parts of one organic whole." (Robinson Jeffers) "How did matter happen that makes the stars and cool planets and living beings? And how did the space happen that contains the stars and planets? . . . Much is still very hypothetical. Much is still unknown. Much, we will never know. . . Life is struggle, pain and suffering. But it is also extraordinarily glorious creativity." (Dr. Kai Woehler) "Like Socrates, I've experienced an inner voice that usually let's me know when I'm about to go off-track, and I've come to believe, with Kant, in a moral law within." (Fitzpatrick) "Nature' – wonderful and awe-inspiring as it is – can't participate in a verbal dialogue, can't exchange and explore ideas with the human mind. We can relate to the animals, the birds, the insects, the fish, and the flora with our most primitive instincts and feel joy, spiritual ecstasy in so recognizing our kinship. Yet nothing in Nature can compare with the human need for a warm

Looking Backward

A Critical Appraisal of Communitarian Thought

Princeton University Press When social reformers blame the current ills of Western culture on the loss of community, they often evoke an ideal past in which societies were characterized by shared values, respect for tradition, commitment to the common good, and similar attributes. Communitarians assert that community was prominent in the past, and argue that reclaiming the role community formerly played is necessary to counter the negative effects of individualism and liberal thinking. Considering the relevance of community for our moral and political life today, Derek Phillips offers the first thorough critique of the historical, often nostalgic, claims that underlie dominant versions of communitarian philosophy. Originally published in 1993, The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Living Life Backward

How Ecclesiastes Teaches Us to Live in Light of the End

Crossway What if it is death that teaches us how to truly live? Keeping the end in mind shapes how we live our lives in the here and now. Living life backward means taking the one thing in our future that is certain—death—and letting that inform our journey before we get there. Looking to the book of Ecclesiastes for wisdom, Living Life Backward was written to shake up our expectations and priorities for what it means to live "the good life." Considering the reality of death helps us pay attention to our limitations as human beings and receive life as a wondrous gift from God—freeing us to live wisely, generously, and faithfully for God's glory and the good of his world.

Stuart: A Life Backwards

HarperCollins UK 'Stuart does not like the manuscript. He's after a bestseller, "like what Tom Clancy writes". "But you are not an assassin trying to frazzle the president with anthrax bombs," I point out. You are an ex-homeless, ex-junkie psychopath, I do not add.'

The Backward Art of Spending Money

Transaction Publishers Nearly 85 years ago, Wesley Clair Mitchell, the acknowledged leader of American economists during the first half of this century, wrote: "Important as the art of spending is, we have developed less skill in its practice than in the practice of making money. Common sense forbids our wasting dollars earned by irksome efforts; and yet we are notoriously extravagant. Ignorance of qualities, uncertainty of taste, lack of accounting, carelessness about prices. . . Many of us scarcely know what becomes of our money. . ." More than ever, in our world of ever-increasing credit card debt, lenient bankruptcy laws, and runaway consumption, these words still ring true. This collection of Mitchell's essays, makes it easier for today's and tomorrow's economists and social scientists to become acquainted with Mitchell's many contributions to the study of the American economy. Regrettably, the passage of time can blur and even obliterate the reputation and achievements of yesterday's leaders of ideas and actions. Although the National Bureau of Economic Research, which Mitchell helped to found and which he led in the 1920s and 1930s, remains a leading research institution, relatively few of its associates, who represent the elite among U.S. academic economists, have any first-hand acquaintance with Mitchell's work. Eli Ginzberg rounds out this edition with Mitchell's comprehensive analysis of "Business Cycles," first published in 1929, an area that commanded most of his scholarly efforts. Ginzberg's essay on Mitchell, written in 1931 and published for the first time in 1997, serves as an appropriate introduction to this new edition. His afterword contains remarks delivered at the 50th anniversary of Mitchell's death at the meeting of the Allied Social Sciences Association held in Chicago early in 1998, a telling tribute to this undisputed giant in the field. Wesley Clair Mitchell (1874-1948) held major teaching posts at the University of California and Columbia University. One of the most eminent U.S. economists, Mitchell focused much of his research on the statistical investigation of business cycles. His two major works are *Business Cycles* (1913) and *Business Cycles: The Problem at its Setting*, (1927). Eli Ginzberg is A. Barton Hepburn Professor Emeritus at the Graduate School of Business, and Director of the Eisenhower Center for the Conservation of Human Resources at Columbia University.

If It's Backwards It Must Be Right

Eddie Austerlitz

Looking Backward 2000-1887

OUP Oxford 'No person can be blamed for refusing to read another word of what promises to be a mere imposition upon his credulity.' Julian West, a feckless aristocrat living in fin-de-siècle Boston, plunges into a deep hypnotic sleep in 1887 and wakes up in the year 2000. America has been turned into a rigorously centralized democratic society in which everything is controlled by a humane and efficient state. In little more than a hundred years the horrors of nineteenth-century capitalism have been all but forgotten. The squalid slums of Boston have been replaced by broad streets, and technological inventions have transformed people's everyday lives. Exiled from the past, West excitedly settles into the ideal society of the future, while still fearing that he has dreamt up his experiences as a time traveller. Edward Bellamy's *Looking Backward* (1888) is a thunderous indictment of industrial capitalism and a resplendent vision of life in a socialist utopia. Matthew Beaumont's lively edition explores the political and psychological peculiarities of this celebrated utopian fiction. ABOUT THE SERIES: For over 100 years Oxford World's Classics has made available the widest range of literature from around the globe. Each affordable volume reflects Oxford's commitment to scholarship, providing the most accurate text plus a wealth of other valuable features, including expert introductions by leading authorities, helpful notes to clarify the text, up-to-date bibliographies for further study, and much more.

Equality & Looking Backward

e-artnow "Equality" is a sequel to *Looking Backward* and it expands on the theories first explored in it. The story takes up immediately after the events of *Looking Backward* with the main characters Julian West, Doctor Leete, and his daughter Edith. Julian continues to learn more about the world of the year 2000. His citizenship in the new America is recognized, and he goes to the bank to obtain his own account, or "credit card," from which he can draw his equal share of the national product. He learns that women are free to compete in many of the same trades as men. Handwriting has been virtually replaced by phonograph records, and jewelry is no longer used, since jewels are now worthless. Julian is amazed by a television-like device, called the electroscope. World communication is simplified, since everyone now speaks a universal language in addition to their native tongue. Not only are there motor cars, but also private air cars. Everyone is now vegetarian, and the thought of eating meat is looked upon with revulsion. "Looking Backward: 2000-1887: Julian West, a young American, towards the end of the 19th century falls into a deep, hypnosis-induced sleep and wakes up 113 years later. He finds himself in the same location (Boston, Massachusetts), but in a totally changed world: It is the year 2000, and while he was sleeping, the United States has been transformed into a socialist utopia. The young man readily finds a guide, Doctor Leete, who shows him around and explains all the advances of this new age, including drastically reduced working hours for people performing menial jobs and almost instantaneous, Internet-like delivery of goods. The two start working on improving the future with the experiences from the past and the presence.

The two start working on improving the future with the experiences from the past and the presence. *Looking Further Backward* - Set in future of 2023 the book narrates the story of how China invades USA in 2020 after China has adopted rampant capitalism as opposed to rest of the world who are in throes of Nationalism, a socialism like set up. Written in a form of a diary, the novel directly hits out at Edward Bellamy's 1888 Utopian novel *Looking Backward*. The political drama that unfolds in this novel will make you deeply wonder how the author could foresee so much!

Looking Backward

Xist Publishing *The First Utopian Society in Modern Literature* "Human history, like all great movements, was cyclical, and returned to the point of beginning. The idea of indefinite progress in a right line was a chimera of the imagination, with no analogue in nature. The parabola of a comet was perhaps a yet better illustration of the career of humanity. Tending upward and sunward from the apheion of barbarism, the race attained the perihelion of civilization only to plunge downward once more to its nether goal in the regions of chaos." - Edward Bellamy, *Looking Backward* Published in 1888. *Looking Backward* is the story of a young 19th-century American who wakes up in the eve of the 21st century, in the year 2000. Guided by Dr. Leete, Julian finds out all there is to know about this new utopian society marveling at the invention of credit cards and 'cable telephone.' Looking Backward, 2000 to 1887

American literature

VM eBooks Living as we do in the closing year of the twentieth century, enjoying the blessings of a social order at once so simple and logical that it seems but the triumph of common sense, it is no doubt difficult for those whose studies have not been largely historical to realize that the present organization of society is, in its completeness, less than a century old. No historical fact is, however, better established than that till nearly the end of the nineteenth century it was the general belief that the ancient industrial system, with all its shocking social consequences, was destined to last, with possibly a little patching, to the end of time. How strange and wellnigh incredible does it seem that so prodigious a moral and material transformation as has taken place since then could have been accomplished in so brief an interval! The readiness with which men accustom themselves, as matters of course, to improvements in their condition, which, when anticipated, seemed to leave nothing more to be desired,

could not be more strikingly illustrated. What reflection could be better calculated to moderate the enthusiasm of reformers who count for their reward on the lively gratitude of future ages! The object of this volume is to assist persons who, while desiring to gain a more definite idea of the social contrasts between the nineteenth and twentieth centuries, are daunted by the formal aspect of the histories which treat the subject. Warned by a teacher's experience that learning is accounted a weariness to the flesh, the author has sought to alleviate the instructive quality of the book by casting it in the form of a romantic narrative, which he would be glad to fancy not wholly devoid of interest on its own account. The reader, to whom modern social institutions and their underlying principles are matters of course, may at times find Dr. Leete's explanations of them rather trite—but it must be remembered that to Dr. Leete's guest they were not matters of course, and that this book is written for the express purpose of inducing the reader to forget for the nonce that they are so to him. One word more. The almost universal theme of the writers and orators who have celebrated this bimillennial epoch has been the future rather than the past, not the advance that has been made, but the progress that shall be made, ever onward and upward, till the race shall achieve its ineffable destiny. This is well, wholly well, but it seems to me that nowhere can we find more solid ground for daring anticipations of human development during the next one thousand years, than by "Looking Backward" upon the progress of the last one hundred. That this volume may be so fortunate as to find readers whose interest in the subject shall incline them to overlook the deficiencies of the treatment is the hope in which the author steps aside and leaves Mr. Julian West to speak for himself.

Muslim Backward Classes

A Sociological Perspective

SAGE Publishing India This book presents the sociological perspectives on Muslim OBCs as a category determined by the Indian State. Although Muslims constitute an important part of the population and are the second largest religious community in the world, as well as in India, social scientists rarely undertake this community to analyze their socioeconomic and educational development. Muslim Backward Classes provides a comprehensive explanation of the origin and meaning of the term "backward class," followed with the historical perspectives of Muslim backwardness in India. The volume fills the gap in the literature and presents a broad-based picture of the problems of Muslim OBCs, highlighting the questions of justice and equal opportunity to all groups irrespective of religion.

Living Backwards

Virtualbookworm.com Publishing Twenty-nine-year-old Jillian Cross refuses to believe that a pair of skinny jeans has led to her untimely demise. Life just isn't that cruel. But when an overly-enthusiastic attempt at squeezing herself into them leads her to fall and lose consciousness, she is faced with just that possibility. When she awakens with both a bruised ego and a bump on her head, she's not in her tiny apartment but her childhood bedroom circa 1999—the spring of her senior year in high school. Jillian knows that time travel isn't logical. But then again, neither was her decision to wear skinny jeans. As she attempts to navigate her way through the halls of Reynolds High, walking the same path and making the same choices she made years before, she knows that any change she makes can have a catastrophic effect on her future. But when she strikes up an unexpected friendship with motorcycle-riding, cigarette-smoking Luke Chambers, can she pretend to be the same shy girl she once was? At least she has her pink sparkly flask to take the edge off. One little change won't hurt, right?

Paying It Backward

How a Childhood of Poverty and Abuse Fueled a Life of Gratitude and Philanthropy

Forefront Books For more than forty years, Tony March generously donated most of his fortune and countless hours to help those in need, but no one ever knew—until now. To the public, he was the founder of one of the most successful minority-owned businesses in the country, a champion for minority business owners, and a respected community leader entrusted to manage \$1 billion in state funds. Privately, however, Tony indulged his true passion: getting his hands dirty serving the homeless community. In shocking detail, *Paying It Backward* presents Tony's incredible journey from poverty, abuse, racism, and depression in a Daytona Beach ghetto to the highest level of business success and a life filled with purpose. More importantly, Tony shows how anyone—no matter who they are or where they come from—can improve their lives, conquer any hardship, and develop a heart for serving others. When you reach the top of the mountain, Tony says, you can either sit at the peak or reach back down and help others climb. In *Paying It Backward*, Tony reflects on his struggles on the way up—and the joy he found by reaching back down.

A Backward Glance

An Autobiography

Simon and Schuster Edith Wharton, the first woman to win the Pulitzer Prize, vividly reflects on her public and private life in this stunning memoir. With richness and delicacy, it describes the sophisticated New York society in which Wharton spent her youth, and chronicles her travels throughout Europe and her literary success as an adult. Beautifully depicted are her friendships with many of the most celebrated artists and writers of her day, including her close friend Henry James. In his introduction to this edition, Louis Auchincloss calls the writing in *A Backward Glance* "as firm and crisp and lucid as in the best of her novels." It is a memoir that will charm and fascinate all readers of Wharton's fiction.
