Social Medicine and Medical Sociology in the Twentieth Century

Rodopi **Little attention has been paid to the history of the influence of the social sciences upon medical thinking and practice in the twentieth century. The essays in this volume explore the consequences of the interaction between medicine and social science by evaluating its significance for the moral and aterial role of medicine in modern societies. Some of the essays examine the ideas of both clinicians and social scientists who believed that highly technologized medicine could be made more humanistic by understanding the social relations of health and illness. Other authors interrogate the critical assault which social science has made upon medicine as a system of knowledge, organisation and power. The volume discusses, therefore, the relationship between social-scientific knowledge both in and of medicine in the twentieth century. Collectively the essays illustrate that the respective power of biology and culture in determining human behaviour and social transition continues to be an unresolved paradox.**

Community Nursing and Primary Healthcare in Twentieth-Century Britain

Routledge This book takes a fresh look at community nursing history in Great Britain, examining the essentially generalist and low profile, domiciliary end of the professional nursing spectrum throughout the twentieth century. It charts the most significant changes affecting the nurse's work on the district including compulsory registration for general nursing, changes in organization, training, conditions of service, and workload. A strong oral history component provides a unique insight into the professional images of district nursing and the complexities of inter- and intra-professional relationships as well as into the changing day-to-day working experiences of the district nurse at 'grass-roots' level. Use of oral history and records of individual nurses attempts to rectify the tendency of nursing history to view nurses as if they were a homogenous group of professionals, thereby recognizing the different experiences of nurses in different regions and environments. The book also considers the degree of influence of medically related technologies and of developments in drugs, materials, communications, and transport on the professional development of district nursing. The work addresses issues of gender relationships central to a nursing profession largely composed of women (throughout much of the period) working alongside a largely male-dominated medical profession.

EBOOK: A Sociology of Mental Health and Illness

McGraw-Hill Education (UK) **How do we understand mental health problems in their social context? A former BMA Medical Book of the Year award winner, this book provides a sociological analysis of major areas of mental health and illness. The book considers contemporary and historical aspects of sociology, social psychiatry, policy and therapeutic law to help students develop an in-depth and critical approach to this complex subject. New developments for the fifth edition include: Brand new chapter on prisons, criminal justice and mental health. Expanded coverage of stigma, class and social networks. Updated material on the Mental Capacity Act, Mental Health Act and the Deprivation of Liberty. A classic in its field, this well established textbook offers a rich and well-crafted overview of mental health and illness unrivalled by competitors and is essential reading for students and professionals studying a range of medical sociology and health-related courses. It is also highly suitable for trainee mental health workers in the fields of social work, nursing, clinical psychology and psychiatry. "Rogers and Pilgrim go from strength to strength! This fifth edition of their classic text is not only a sociology but also a psychology, a philosophy, a history and a polity. It combines rigorous scholarship with radical argument to produce incisive perspectives on the major contemporary questions concerning mental health and illness. The authors admirably balance judicious presentation of the range of available understandings with clear articulation of their own positions on key issues. This book is essential reading for everyone involved in mental health work." Christopher Dowrick, Professor of Primary Medical Care, University of Liverpool, UK "Pilgrim and Rogers have for the last twenty years given us the key text in the sociology of mental health and illness. Each edition has captured the multi-layered and ever changing landscape of theory and practice around psychiatry and mental health, providing an essential tool for teachers and researchers, and much loved by students for the dexterity in combining scope and accessibility. This latest volume, with its focus on community mental health, user movements criminal justice and the need for inter-agency working, alongside the more classical sociological critiques around social theories and social inequalities, demonstrates more than ever that sociological perspectives are crucial in the understanding and explanation of mental and emotional healthcare and practice, hence its audience extends across the related disciplines to everyone who is involved in this highly controversial and socially relevant arena." Gillian Bendelow, School of Law Politics and Sociology, University of Sussex, UK "From the classic bedrock studies to contemporary sociological perspectives on the current controversy over which scientific organizations will define diagnosis, Rogers and Pilgrim provide a comprehensive, readable and elegant overview of how social factors shape the onset and response to mental health and mental illness. Their sociological vision embraces historical, professional and socio-cultural context and processes as they shape the lives of those in the community and those who provide care; the organizations mandated to deliver services and those that have ended up becoming unsuitable substitutes; and the successful and unsuccessful efforts to improve the lives through science, challenge and law." Bernice Pescosolido, Distinguished Professor of Sociology, Indiana University, USA**
