## An Introduction to the Rhythmic Language of South Indian Music

Wesleyan University Press Solkattu, the spoken rhythms and patterns of hand-clapping used by all musicians and dancers in the classical traditions of South India, is a subject of worldwide interest—but until now there has not been a textbook for students new to the practice. Designed especially for classroom use in a Western setting, the manual begins with rudimentary lessons in the simplest South Indian tala, or metric cycle, and proceeds step-by-step into more challenging material. The book then provides lessons in the eight-beat adi tala, arranged so that by the end, students will have learned a full percussion piece they can perform as an ensemble. Solkattu Manual includes web links to video featuring performances of all 150 lessons, and full performances of all three of the outlined small-ensemble pieces. Ideal for courses in world music and general musicianship, as well as independent study. Book lies flat for easy use.

## Advances in Digital Forensics X

### 10th IFIP WG 11.9 International Conference, Vienna, Austria, January 8-10, 2014, Revised Selected Papers

Springer Digital forensics deals with the acquisition, preservation, examination, analysis and presentation of electronic evidence. Networked computing, wireless communications and portable electronic devices have expanded the role of digital forensics beyond traditional computer crime investigations. Practically every crime now involves some aspect of digital evidence; digital forensics provides the techniques and tools to articulate this evidence. Digital forensics also has myriad intelligence applications. Furthermore, it has a vital role in information assurance -- investigations of security breaches yield valuable information that can be used to design more secure systems. *Advances in Digital Forensics X* describes original research results and innovative applications in the discipline of digital forensics. In addition, it highlights some of the major technical and legal issues related to digital evidence and electronic crime investigations. The areas of coverage include: - Internet Crime Investigations; - Forensic Techniques; - Mobile Device Forensics; - Forensic Tools and Training. This book is the 10th volume in the annual series produced by the International Federation for Information Processing (IFIP) Working Group 11.9 on Digital Forensics, an international community of scientists, engineers and practitioners dedicated to advancing the state of the art of research and practice in digital forensics. The book contains a selection of twenty-two edited papers from the 10th Annual IFIP WG 11.9 International Conference on Digital Forensics, held in Vienna, Austria in the winter of 2014. *Advances in Digital Forensics X* is an important resource for researchers, faculty members and graduate students, as well as for practitioners and individuals engaged in research and development efforts for the law enforcement and intelligence communities.

### Adaptive Hypermedia and Adaptive Web-Based Systems

### 5th International Conference, AH 2008, Hannover, Germany, July 29 - August 1, 2008, Proceedings

Springer Adaptive Hypermedia has emerged as an important area of both academic and deployed research. It encompasses a broad range of research that will enable personalized, adaptive hypermedia systems to play an even more effective role in people's lives. The Web has enabled the widespread use of many personalized systems, such as recommenders, personalized filters and retrieval systems, e-learning systems and various forms of collaborative systems. Such systems have been widely deployed in diverse domains such as e-Commerce, e-Health, e-Government, digital libraries, personalized travel planning as well as tourist and cultural heritage services. They are particularly promising for users with special needs. The exciting possibilities of such deployed adaptive hypermedia systems rely on research progress in a broad range of areas such as: user profiling and modeling; acquisition, updating and management of user models; group modeling and community-based profiling; recommender systems and recommendation strategies; data mining for personalization; the Semantic Web; adaptive multimedia content authoring and delivery; ubiquitous computing environments and Smart Spaces; personalization for the plethora of mobile devices, such as PDAs, mobile phones and other hand-held devices; and pragmatics such as privacy, trust and security. Empirical studies of adaptive hypermedia and Web systems are also critical to informing future directions. The AdaptiveHypermediaconferenceshavebecomethe majorforumsforthe scientific exchange and presentation of research results on adaptive hypermedia and adaptive Web-based systems.
