## Digital Suffragists

### Women, the Web, and the Future of Democracy

MIT Press Why women's voices are outnumbered online and what we can do about it, by a New York Times comment moderator. If you've read the comments posted by readers of online news sites, you may have noticed the absence of women's voices. Men are by far the most prolific commenters on politics and public affairs. When women do comment, they are often attacked or dismissed more than men are. In fact, the comment forums on news sites replicate conditions of the offline and social media worlds, where women are routinely interrupted, threatened, demeaned, and called wrong, unruly, disgusting, and out of place. In Digital Suffragists, Marie Tessier—a veteran journalist and a New York Times comment moderator for more than a decade—investigates why women's voices are outnumbered online and what we can do about it. The suffragists of the early twentieth century were jailed for trying to vote. Can a twenty-first century democracy be functional when half of the population is not fully represented in a primary form of political

communication? Tessier shows that for online comments, it's a design problem: the linear blog comment formula was based on deeply gender-biased assumptions. Technologies designed with a broad range of end users in mind, she points out, are more successful and beneficial than those that reflect the designer's own habits of mind. Tessier outlines benchmarks for a more democratic media, all of which stem from one fundamental idea: media must adopt gender and racial representation as key performance indicators. Equal speaking time for women is a measure of democracy.

## The Age of Surveillance Capitalism

## The Fight for a Human Future at the New Frontier of Power

Profile Books THE TOP 10 SUNDAY TIMES BESTSELLER Shortlisted for the FT Business Book of the Year Award 2019 'Easily the most important book to be published this century. I find it hard to take any young activist seriously who hasn't at least familiarised themselves with Zuboff's central ideas.' - Zadie Smith, The Guardian The challenges to humanity posed by the digital future, the first detailed examination of the unprecedented form of power called "surveillance capitalism," and the quest by powerful corporations to predict and control us. The heady optimism of the Internet's early days is gone. Technologies that were meant to liberate us have deepened inequality and stoked divisions. Tech companies gather our information online and sell it to the highest bidder, whether government or retailer. Profits now depend not only on predicting our behaviour but modifying it too. How will this fusion of capitalism and the digital shape our values and define our future? Shoshana Zuboff shows that we are at a crossroads. We still have the power to decide what kind of world we want to live in, and what we decide now will shape the rest of the century. Our choices: allow technology to enrich the few and impoverish the many, or harness it and distribute its benefits. The Age of Surveillance Capitalism is a deeply-reasoned examination of the threat of unprecedented power free from democratic oversight. As it explores this new capitalism's impact on society, politics, business, and technology, it exposes the struggles that will decide both the next chapter of capitalism and the meaning of information civilization. Most critically, it shows how we can protect ourselves and our communities and ensure we are the masters of the digital rather than its slaves.
