Nathan Ron argues that Erasmus was devoted to Christian Eurocentrism and not as tolerant as he is often portrayed. Erasmus' thought is situated vis-à-vis the thought of contemporaries such as the cosmographer and humanist Aeneas Sylvius Piccolomini who became Pope Pius II; the philosopher, scholar, and Cardinal, Nicholas of Cusa; and the Dominican missionary and famous defender of the Native Americans, Bartolomé Las Casas. In his new book, Just Needs a Recharge: The Hack Mechanic Guide to Vintage Air Conditioning, Rob Siegel details exactly what's needed to resurrect long-dead air conditioning in a vintage car, or install a/c in a car that never had it. In a level of detail not found in any other automotive a/c book, Rob reveals what you need to know about flare and o-ring fittings, upgrading to a rotary-style compressor and a parallel-flow condenser, making or specifying custom hoses, and selecting refrigerant so that the a/c blows cold enough to be usable. Although the book draws from Rob's BMW experience (with specifics for the BMW 2002 and 3.0CS), and concentrates on vintage a/c systems (those that have flare fittings and originally contained R12), most of the information applies to any air conditioning system, foreign or domestic, vintage or modern. Written in Rob's entertaining Hack Mechanic narrative voice, and including 240 photographs and illustrations, the book covers theory, the choice of refrigerant (R12, R134a, other EPA-approved, non-EPA-approved), legality, tools for a/c work, fittings and sizes, the compressor, the evaporator assembly and expansion valve or orifice tube, the condenser and fan, the receiver/drier or accumulator, electrical connections and compressor cycling, connecting and using manifold gauges, the basic steps for a/c rejuvenation, from-scratch a/c retrofit, making and installing hoses, flushing the system, pressure-testing and leak detection, evacuating and charging the system troubleshooting, and other things that heat up the cabin. **Every Officer is a Leader Transforming Leadership in Police, Justice, and Public Safety** CRC Press Every Officer is a Leader: Transforming Leadership in Police, Justice, and Public Safety, authored by leadership expert Terry Anderson and several well known leaders in the law enforcement and criminal justice profession, responds to the need for a comprehensive leadership development model for the education and training of police, justice and public safety supervisors, managers and front line officers. He examines how leadership development has a profound impact on the morale and performance of individual officers, teams, and organizations, illustrating in depth and detail how police and other justice and public safety leaders (in corrections, fire, customs, immigration, security, courts, etc.) can implement the Transforming Leadership process, skills, and principles. The recent focus (during the past 10 years) on community policing initiatives has made competency based leadership skills training essential for front line officers. The author's innovative contribution is a focus on the necessity to build "a leadership organization" before - and to an extent, while - you move ahead into building a "learning organization" that is responsive to community and internal organizational needs. The personal, team, and organization development skills discussed in this book are necessary pre-requisites to successful implementation of any neighborhood or community policing initiatives. Every Officer is a Leader: Transforming Leadership in Police, Justice, and Public Safety provides a model for integrating other models into a holistic leadership development framework. It furnishes a map for developing critical leadership skills with self-assessment, includes the developmental aspects of leadership expert Terry Anderson's previous book on Transforming Leadership, and applies them to law enforcement and criminal justice. Anderson and his contributing authors add clarity, perspective, and examples to show how individual leaders can develop themselves, and one another, into high-performance team leaders and officers who motivate others to respond to issues that affect the morale, health, and safety of the communities in which they

serve. This new focus adds a perspective on security issues that affect police, justice and public safety organizations. **The Shelby American Story** Enthusiast Books The Shelby American Story is about the decade of the sixties. This book, written by a leading journalist and Quattro devotee, explores 24 years of factory-prepared and factory-supported Quattros in motorsport, from 1980 to 2004. It is a tale that extends from rough rally stages to race tracks, from pine-fringed ice trails in the depths of European winters to the shimmering heat haze and melting asphalt of Texas street racing. Along the way, it explains how Quattros collected four world rally championships, five American driver/manufacturer crowns and a single-year haul of seven international touring car titles, plus numerous other honours. With the five-cylinder turbocharged Quattro in its original form, rallying in the early years yielded numerous wins, most of all in 1982, when seven victories in 11 world championship rallies brought the first title. With the short-wheelbase Sport added to Audi's armoury, 1984 became an all-action, all-conquering rallying season with two more world titles won, for drivers (Stig Blomqvist) and manufacturers. Three stunning Pike's Peak wins were achieved in America in successive years, for Michele Mouton (1985), Bobby Unser (1986) and Walter Röhrl (1987). Starting with double championships for the 200 quattro in TransAm (1988) and the 90 Quattro in IMSA (1989), racing success unfolded in America. Exuberant Hans Stuck was the star driver, but consistent team-mate Hurley Haywood captured that 1988 title. Touring car campaigns during the 1990s brought huge success, starting with fearsome V8 Quattro 'racing limos' in Germany. Global achievements followed with A4 Quattros in many national Super Touring series throughout Europe and in Australia, including Frank Biela's 1996 title-winning campaign in Britain. Audi continued to win on track in the new millennium as race versions of the S4 and RS6 captured five SCCA GT Championship titles in America. **50 Years of Road & Track The Art of the Automobile** Motorbooks International Chronicles the visual history of Road & Track magazine, including photographs, paintings, technical drawings, and cartoons. **Em Choi (I Play) Autocross to Win (DG's Autocross Secrets) The Art and Science of Developing Autocross Cars** Dennis Grant, the "Street Modified Godfather", built an SCCA ProSolo Championship and FIA Canadian National Championship winning autocross car. Equally applicable to road racers, rally cars, circle track cars, and high performance street cars, this book is full of information on how to make cars handle at the extreme limits of performance. Includes chapters on tuning suspensions, building shocks, and selecting tires - and much, much more! Whether you are just starting out building a high-performance car, or a grizzled veteran of motorsports, this book is full of insightful (and occasionally funny) observations on what it takes to tune the car and driver system in order to win races. Contains theory and practical advice as well.
