An American Aristocracy

Southern Planters in Antebellum Philadelphia

Univ of South Carolina Press Placing class rather than race or gender at the center of this comparative study of North and South, Kilbride exposes the close connections that united privileged southerners and Philadelphians in the years leading to the Civil War. He finds that the bonds between these similarly educated and socialized groups to be so durable that they resisted sectional warfare. Kilbride notes that southern planters were drawn particularly to Philadelphia because of its proximity to the South and perception of the city as being untainted by northern radicalism. In addition, Philadelphia possessed well-regarded schools, prestigious intellectual societies, historical landmarks, and fashionable shopping districts. In the city's parlors, ballrooms, and classrooms, privileged northerners and southerners forged a republican aristocracy that ignored the Mason-Dixon line.

Feminism as Life's Work

Four Modern American Women through Two World Wars

Rutgers University Press With suffrage secured in 1920, feminists faced the challenge of how to keep their momentum going. As the center of the movement shrank, a small, self-appointed vanguard of "modern" women carried the cause forward in life and work. *Feminism as Life's Work* profiles four of these women: the author Inez Haynes Irwin, the historian Mary Ritter Beard, the activist Doris Stevens, and Lorine Pruette, a psychologist. Their life-stories, told here in full for the first time, embody the changes of the first four decades of the twentieth century—and complicate what we know of the period. Through these women's intertwined stories, Mary Trigg traces the changing nature of the women's movement across turbulent decades rent by world war, revolution, global depression, and the rise of fascism. Criticizing the standard division of feminist activism as a series of historical waves, Trigg exposes how Irwin, Beard, Stevens, and Pruette helped push the U.S. feminist movement to victory and continued to propel it forward from the 1920s to the 1960s, decades not included in the "wave" model. At a time widely viewed as the "doldrums" of feminism, the women in this book were in fact taking the cause to new sites: the National Women's Party; sexuality and relations with men; marriage; and work and financial independence. In their utopian efforts to reshape work, sexual relations, and marriage, modern feminists ran headlong into the harsh realities of male power, the sexual double standard, the demands of motherhood, and gendered social structures. In *Feminism as Life's Work*, Irwin, Beard, Stevens, and Pruette emerge as the heirs of the suffrage movement, guardians of a long feminist tradition, and catalysts of the belief in equality and difference. Theirs is a story of courage, application, and perseverance—a story that revisits the "bleak and lonely years" of the U.S. women's movement and emerges with a fresh perspective of the history of this pivotal era.

Encyclopedia Of Freemasonry And Its Kindred Sciences, Volume 2: D-L

Jazzybee Verlag Dr. Albert G. Mackey appears as author of this " Encyclopedia of Freemasonry and its Kindred Sciences," which, being a library in itself, superseded most of the Masonic works which have been tolerated by the craft — chiefly because none better could be obtained. Here is a work which fulfils the hope which sustained the author through ten years' literary labor, that, under one cover he "would furnish every Mason who might consult its pages the means of acquiring a knowledge of all matters connected with the science, the philosophy, and the history of his order." Up to the present time the modern literature of Freemasonry has been diffuse, lumbering, unreliable, and, out of all reasonable proportions. There is, in Mackey's "Encyclopaedia of Masonry," well digested, well arranged, and confined within reasonable limits, all that a Mason can desire to find in a book exclusively devoted to the history, the arts, science, and literature of Masonry. This is volume two out of four and covering the letters D to L.

Life Sciences, Grade 10

*Study & Master Life Sciences Grade 10 has been especially developed by an experienced author team for the Curriculum and Assessment Policy Statement (CAPS). This new and easy-to-use course helps learners to master essential content and skills in Life Sciences. The comprehensive Learner's Book includes: * an expanded contents page indicating the CAPS coverage required for each strand * a mind map at the beginning of each module that gives an overview of the contents of that module * activities throughout that help develop learners' science knowledge and skills as well as Formal Assessment tasks to test their learning * a review at the end of each unit that provides for consolidation of learning * case studies that link science to real-life situations and present balanced views on sensitive issues. * 'information' boxes providing interesting additional information and 'Note' boxes that bring important information to the learner's attention*
