**EBOOK: CHILDREN'S LITERATURE AND COMPUTER BASED TEACHING**

---

*McGraw-Hill Education (UK)* "This stellar book extends teachers' thinking well beyond 'book spaces' and into 'digital spaces' by offering theorized approaches to analyzing children's literature across media, and careful descriptions of effective learning activities that are rich in detail and practical advice. This book (and its digital spaces) is an indispensable guide to engaging with children's literature and new digital media." Michele Knobel, Montclair State University, USA. "The book overall is exciting, informative and practical, outlining important theoretical perspectives and ideas while also providing much wisdom and advice to teachers about how to

transform their literary programs." Frances Christie, Emeritus Professor of Language and Literacy Education, University of Melbourne and Honorary Professor of Education, University of Sydney, Australia. This book connects classroom teaching of children's literature with the digital age. It celebrates the charm of children's literature and its role in literacy development, as well as the appeal of information and communications technology (ICT) to students and its capacity to enrich students' learning and enjoyment of literary texts. The authors outline the ways in which children's literature is developing new dimensions, for example: The re-publication of children's books on CD ROM and the world wide web Web resources for working with literary texts, including e-mail discussion groups Children's participation in the collaborative construction of online narratives The book provides practical guidance for teachers who are inexperienced with ICT. It describes and discusses implementation of activities that extend traditional approaches to literary texts and take advantage of available technology.

#### **SCIENCE, FABLES AND CHIMERAS**

---

#### **CULTURAL ENCOUNTERS**

*Cambridge Scholars Publishing* The history of science provides numerous examples of the way in which imagination, religion and mythology have sometimes helped and sometimes hindered scientific progress. While established ideas and beliefs clearly held back the discoveries of Copernicus, Galileo and Darwin, the intuitive knowledge found in mythology, art and religion has often proved useful in indicating new ways in which to explore or represent new knowledge of the world. Stories, fables and images have contributed to drawing a fuller picture of the past, understanding the present and imagining the future. The essays in this book, written by academics, writers and artists from various fields ranging from La Fontaine's fables to nanotechnology and modern art, all point out the ways in which imagination works its way into all the fields of knowledge. At both ends of the spectrum, the hybrid nature of the chimera emerges as a pivotal symbol of both man's predation instinct and a powerful symbol of his fear of extinction. This interdisciplinary book, weaving together visual representation, literature, mysticism, and science, will appeal to historians of science, philosophy, art and religion. It will also be of interest to scholars in cultural studies and anthropology. Drawing on recent scientific research and artistic production, the volume will additionally interest a wider audience wishing to learn more about man's obsession and fascination with the potent symbolism of dinosaurs and dragons and all hybrid forms generated by the human imagination and recent technology. *Default- TCM*
