HCI International 2015 - Posters' Extended Abstracts

International Conference, HCI International 2015, Los Angeles, CA, USA, August 2-7, 2015. Proceedings, Part I

Springer This is the first volume of the two-volume set (CCIS 528 and CCIS 529) that contains extended abstracts of the posters presented during the 17th International Conference on Human-Computer Interaction, HCII 2015, held in Heraklion, Crete, Greece in August 2015. The total of 1462 papers and 246 posters presented at the HCII 2015 conferences was carefully reviewed and selected from 4843 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The

papers included in this volume are organized in the following topical sections: design and evaluation methods, techniques and tools; cognitive and psychological issues in HCI; virtual, augmented and mixed reality; cross-cultural design; design for aging; children in HCI; product design; gesture, gaze and motion detection, modelling and recognition; reasoning, optimisation and machine learning for HCI; information processing and extraction for HCI; image and video processing for HCI; brain and physiological parameters monitoring; dialogue systems.

The Psychology and Dynamics Behind Social Media Interactions

IGI Global Adolescents and young adults are the main users of social media. This has sparked interest among researchers regarding the effects of social media on normative development. There exists a need for an edited collection that will provide readers with both breadth and depth on the impacts of social media on normative development and social media as an amplifier of positive and negative behaviors. The Psychology and Dynamics Behind Social Media Interactions is an essential reference book that focuses on current social media research and provides insight into the benefits and detriments of social media through the lens of psychological theories. It enhances the understanding of current research regarding the antecedents to social media use and problematic use, effects of use for identity formation, mental and physical health, and relationships (friendships and romantic and family relationships) in addition to implications for education and support groups. Intended to aid in collaborative research opportunities, this book is ideal for clinicians, educators, researchers, councilors, psychologists, and social workers.

The Handbook of Communication Skills

Routledge The Handbook of Communication Skills is recognised as one of the core texts in the field of communication, offering a state-of-the-art overview of this rapidly evolving field of study. This comprehensively revised and updated fourth edition arrives at a time when the realm of interpersonal communication has attracted immense attention. Recent research showing the potency of communication skills for success in many walks of life has stimulated considerable interest in this area, both from academic researchers, and from practitioners whose day-to-day work is so dependent on effective social skills. Covering topics such as non-verbal behaviour, listening, negotiation and persuasion, the book situates communication in a range of different contexts, from interacting in groups to the counselling interview. Based on the core tenet that interpersonal communication can be conceptualised as a form of skilled activity, and including new chapters on cognitive behavioural therapy and coaching and mentoring, this new edition also places communication in context with advances in digital technology. The Handbook

of Communication Skills represents the most significant single contribution to the literature in this domain. Providing a rich mine of information for the neophyte and practising professional, it is perfect for use in a variety of contexts, from theoretical mainstream communication modules on degree programmes to vocational courses in health, business and education. With contributions from an internationally renowned range of scholars, this is the definitive text for students, researchers and professionals alike.

Interpersonal Communication Book

Updated in its 13th edition, Joseph Devito's The Interpersonal Communication Book provides a highly interactive presentation of the theory, research, and skills of interpersonal communication with integrated discussions of diversity, ethics, workplace issues, face-to-face and computer-mediated communication and a new focus on the concept of choice in communication. This thirteenth edition presents a comprehensive view of the theory and research in interpersonal communication and, at the same time, guides readers to improve a wide range of interpersonal skills. The text emphasizes how to choose among those skills and make effective communication choices in a variety of personal, social, and workplace relationships

Strategic Uses of Social Technology

An Interactive Perspective of Social Psychology

Cambridge University Press On an everyday basis, we communicate with one another using various technological media, such as text messaging, social networking tools, and electronic mail, in work, educational, and personal settings. As a consequence of the increasing frequency of use and importance of computer-supported interaction, social scientists in particular have heeded the call to understand the social processes involved in such interactions. In this volume, the editors explore how aspects of a situation interact with characteristics of a person to help explain our technologically supported social interactions. The person-by-situation interaction perspective recognizes the powerful role of the situation and social forces on behavior, thought, and emotion, but also acknowledges the importance of person variables in explaining social interaction, including power and gender, social influence, truth and deception, ostracism, and leadership. This important study is of great relevance to modern readers, who are more and more frequently using technology to communicate with one another.

Psychology and the Internet

Intrapersonal, Interpersonal, and Transpersonal Implications

Elsevier The previous edition provided the first resource for examining how the Internet affects our definition of who we are and our communication and work patterns. It examined how normal behavior differs from the pathological with respect to Internet use. Coverage includes how the internet is used in our social patterns: work, dating, meeting people of similar interests, how we use it to conduct business, how the Internet is used for learning, children and the Internet, what our internet use says about ourselves, and the philosophical ramifications of internet use on our definitions of reality and consciousness. Since its publication in 1998, a slew of other books on the topic have emerged, many speaking solely to internet addiction, learning on the web, or telehealth. There are few competitors that discuss the breadth of impact the internet has had on intrpersonal, interpersonal, and transpersonal psychology. Provides the first resource for looking at how the Internet affects our definition of who we are Examines the philosophical ramifications of Internet use and our definitions of self, reality, and work Explores how the Internet is used to meet new friends and love interests, as well as to conduct business Discusses what represents normal behavior with respect to Internet use

Interpersonal Communication

Putting Theory into Practice

Routledge This fully revised text demystifies interpersonal communication skills by bringing the latest research together with practical guidance that prepares students to discern key communication dynamics and communicate more effectively in all areas of their lives. The new edition draws on current theory and research to guide students through the foundations of the discipline, recent developments in scientific research, and tips for improving their own interpersonal communication skills. In addition, readers will find: Expanded coverage of technology and computer-mediated communication, including explicit examples of what interpersonal communication looks like online. Invitations to engage with elaborated descriptions of theories and related resources on the companion website whenever prominent theories of interpersonal communication are mentioned in the text. A commitment to gender inclusive language and topics, as well as a new feature, "IDEA: Inclusion, Diversity, Equity, and Access," that invites students to consider ways to address exclusion and inequity in interpersonal communication. The fully revamped companion website includes updates across all resources, additional videos, self-quizzes for students, and all-new instructor resources, which can be accessed at www.routledge.com/cw/solomon. Also new to the companion website for this edition are links to essays and videos featuring the work that students in the Communication Studies program at the California State Prison, Los Angeles County,

produced in response to self-reflection prompts in the first edition. These materials provide insight into facets of interpersonal communication in these students' lives, and they offer a broad range of rich life experiences. Interpersonal Communication: Putting Theory Into Practice, Second Edition is ideal for undergraduate students in courses on interpersonal communication and communication skills.

Arnold and Boggs's Interpersonal Relationships - E-Book

Professional Communication Skills for Canadian Nurses

Elsevier Health Sciences Engaging, comprehensive coverage presents the most current issues and communication concepts. Fully adapted content reflects Canada's unique health care context and cultural landscape. Canadian statistics, research, references and resources, guidelines, assessment and screening tools, and more are incorporated throughout the text. Canadian cultural and demographic considerations address issues related to race/ethnicity, Indigenous peoples, gender identity, LGBTQ2 community, family composition, recent immigrants, refugees, and vulnerable persons. Engaging with Humility: Authentic Interpersonal Communication in Partnership with Indigenous Peoples chapter increases awareness and knowledge of the impact of colonization on Indigenous peoples, in order to understand and develop practices which respectfully engage in cultural safety and humility through holistic communication with Indigenous peoples and communities. Rich art programme reflects Canada's cultural diversity in the health care setting. Emphasis on collaborative communication includes related evidence-informed case studies and analysis. Socio-cultural communication competencies coverage discusses how to reduce health disparities and increase health literacy. Questions for Review and Discussion help students practise their reflective analysis skills and provide opportunities for thoughtful review of chapter content. Content on social media and transitional care delivery reflects current practice standards. Simulation exercises enable students to practise, observe, and critically evaluate their professional communication skills in a safe learning environment. Case examples help students learn to develop empathy for patients' perspectives and needs. Discussion of spirituality and end-of-life needs focuses on trust, empathy, and the nurse-patient relationship — all central components of holistic nursing. Nursing, behavioural, developmental, family, and communication theories provide an essential foundation and a theoretical perspective for effective communication. Ethical Dilemma boxes with reflection questions at the end of each chapter help students absorb and retain key ethical content throughout the text. Evidence-Informed Nursing Practice boxes in each chapter offer a summary of research findings related to the chapter subject and are intended to strengthen awareness of the link between research and practice.

Separate chapters on communication across the lifespan highlight crucial communication tools that are the first step in developing a culture of safety in contemporary health care delivery.

Interpersonal Interactions and Language Learning

Face-to-Face vs. Computer-Mediated Communication

Springer Nature This book takes as its starting point the assumption that interpersonal communication is a crucial aspect of successful language learning. Following an examination of different communicative models, the authors focus on traditional face-to-face (F2F) interactions, before going on to compare these with the forms of computer-mediated communication (CMC) enabled by recent developments in educational technology. They also address the question of individual differences, particularly learners' preferred participation styles, and explore how F2F and CMC formats might impact learners differently. This book will be of interest to students and scholars of computer-mediated communication (CMC), computer-assisted language learning (CALL), technology-enhanced language learning (TELL), language acquisition and language education more broadly.

Human Rights and the Impact of ICT in the Public Sphere: Participation, Democracy, and Political Autonomy

Participation, Democracy, and Political Autonomy

IGI Global The creation of a new public realm through the use of the Internet and ICT may positively promote political liberties and freedom of speech, but could also threaten the political and public autonomy of the individual. Human Rights and the Impact of ICT in the Public Sphere: Participation, Democracy, and Political Autonomy focuses on the new technological era as an innovative way to initiate democratic dialogue, but one that can also endanger individual rights to freedom, privacy, and

autonomy. This reference book focuses on the new opportunities technology offers for political expression and will be of use to both academic and legal audiences, including academics, students, independent authorities, legislative bodies, and lawyers.

EBOOK: Human Communication: South African edition

McGraw Hill The new South African edition of Tubbs and Moss offers examples, applications and cases tailored to the local market whilst retaining the successful focus on the principles and contexts of communication studies. The authors link theory and research with fundamental concepts and create plentiful opportunities for students to apply their understanding and develop useful communication skills. The new edition is fully updated with the most up to date reseach and examples, with a strong focus on cultural diversity, technology and local applications.

Interpersonal Relationships in Education: From Theory to Practice

Springer This book brings together recent research on interpersonal relationships in education from a variety of perspectives including research from Europe, North America and Australia. The work clearly demonstrates that positive teacher-student relationships can contribute to student learning in classrooms of various types. Productive learning environments are characterized by supportive and warm interactions throughout the class: teacher-student and student-student. Similarly, at the school level, teacher learning thrives when there are positive and mentoring interrelationships among professional colleagues. Work on this book began with a series of formative presentations at the second International Conference on Interpersonal Relationships in Education (ICIRE 2012) held in Vancouver, Canada, an event that included among others, keynote addresses by David Berliner, Andrew Martin and Mieke Brekelmans. Further collaboration and peer review by the editorial team resulted in the collection of original research that this book comprises. The volume (while eclectic) demonstrates how constructive learning environment relationships can be developed and sustained in a variety of settings. Chapter contributions come from a range of fields including educational and social psychology, teacher and school effectiveness research, communication and language studies, and a variety of related fields. Together, they cover the important influence of the relationships of teachers with individual students, relationships among peers, and the relationships between teachers and their professional colleagues.

Effective Interpersonal and Team Communication Skills for Engineers

John Wiley & Sons Presents key principles of communication that support clear exchanges in a technical context and help engineers learn effective communication skills Effective communication is a necessity for engineers. Even minor on-the-job misunderstandings can cost time, money, or worse. Yet even though recent studies show that improved communication makes for better engineers, the ability to speak clearly and listen carefully have historically been considered "soft skills" and are not typically or explicitly addressed in engineering programs. Working from basic units called microskills, Effective Interpersonal and Team Communication Skills for Engineers shows readers, one step at a time, how to engage, listen, manage conflict, and influence others with highly constructive, repeatable communication exchanges. This career-enhancing handbook: Presents communication skills for both technical issues and social situations in an engineering context Breaks skills down to elemental usage forms as microskills Includes plenty of practice exercises, case studies, and self-assessment tools Helps develop higher-level skills for more complex situations, such as dealing with confrontation and conflict negotiation Features a direct, user-friendly, practice-oriented format Effective Interpersonal and Team Communication Skills for Engineers is a must-have guide for professionals and an important supplement for engineering programs at all levels.

ECSM2016-Proceedings of the 3rd European Conference on Social Media

Academic Conferences and publishing limited

Handbook of Research on the Societal Impact of Digital Media

IGI Global The evolution of digital media has enhanced global perspectives in all facets of communication, greatly increasing the range, scope, and accessibility of shared information. Due to the tremendously broad-reaching influence of digital media, its impact on learning, behavior, and social interaction has become a widely discussed topic of study, synthesizing the research of academic scholars, community educators, and developers of civic programs. The Handbook of Research on the Societal Impact of Digital Media is an authoritative reference source for recent developments in the dynamic field of digital media. This timely publication provides an overview of technological developments in digital media and their myriad

applications to literacy, education, and social settings. With its extensive coverage of issues related to digital media use, this handbook is an essential aid for students, instructors, school administrators, and education policymakers who hope to increase and optimize classroom incorporation of digital media. This innovative publication features current empirical studies and theoretical frameworks addressing a variety of topics including chapters on instant messaging, podcasts, video sharing, cell phone and tablet applications, e-discussion lists, e-zines, e-books, e-textiles, virtual worlds, social networking, cyberbullying, and the ethical issues associated with these new technologies.

Power in Close Relationships

Cambridge University Press An outline of how power, an inherent feature of social interactions, operates and affects close relationships.

Intercultural Competence Interpersonal Communication Across Cultures

Pearson This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. For courses in Intercultural Communication Fosters the proficiency in intercultural communication vital for students to thrive in private and public life Intercultural Competence: Interpersonal Communication Across Cultures, Eighth Edition gives students sufficient knowledge, appropriate motivations, and useful skills that enable them to experience how cultural differences can affect communication with others. The authors offer some practical suggestions concerning the adjustments necessary to achieve intercultural competence when dealing with these cultural differences. Upon completing this text, students will be able to appreciate the impact of cultural patterns on intercultural communication; use both practical and theoretical ideas to understand intercultural communication competence; understand some of the central contexts in which intercultural communication occurs; and discuss cultural identity and the role of cultural biases. NOTE: This ISBN is for a Pearson Books a la Carte edition: a convenient, three-hole-punched, loose-leaf text. In addition to the flexibility offered by this format, Books a la Carte editions offer students great value, as they cost significantly less than a bound textbook. Intercultural Competence: Interpersonal Communication Across Cultures, Eighth Edition is also available via Revel™, an interactive learning environment that enables students to read, practice, and study in one continuous experience.

Assessing 21st Century Skills

Summary of a Workshop

National Academies Press The routine jobs of yesterday are being replaced by technology and/or shipped off-shore. In their place, job categories that require knowledge management, abstract reasoning, and personal services seem to be growing. The modern workplace requires workers to have broad cognitive and affective skills. Often referred to as "21st century skills," these skills include being able to solve complex problems, to think critically about tasks, to effectively communicate with people from a variety of different cultures and using a variety of different techniques, to work in collaboration with others, to adapt to rapidly changing environments and conditions for performing tasks, to effectively manage one's work, and to acquire new skills and information on one's own. The National Research Council (NRC) has convened two prior workshops on the topic of 21st century skills. The first, held in 2007, was designed to examine research on the skills required for the 21st century workplace and the extent to which they are meaningfully different from earlier eras and require corresponding changes in educational experiences. The second workshop, held in 2009, was designed to explore demand for these types of skills, consider intersections between science education reform goals and 21st century skills, examine models of high-quality science instruction that may develop the skills, and consider science teacher readiness for 21st century skills. The third workshop was intended to delve more deeply into the topic of assessment. The goal for this workshop was to capitalize on the prior efforts and explore strategies for assessing the five skills identified earlier. The Committee on the Assessment of 21st Century Skills was asked to organize a workshop that reviewed the assessments and related research for each of the five skills identified at the previous workshops, with special attention to recent developments in technology-enabled assessment of critical thinking and problem-solving skills. In designing the workshop, the committee collapsed the five skills into three broad clusters as shown below: Cognitive skills: nonroutine problem solving, critical thinking, systems thinking Interpersonal skills: complex communication, social skills, team-work, cultural sensitivity, dealing with diversity Intrapersonal skills: self-management, time management, self-development, self-regulation, adaptability, executive functioning Assessing 21st Century Skills provides an integrated summary of the presentations and discussions from both parts of the third workshop.

Cambridge National Level 1/2 Health and Social Care

Hachette UK Exam Board: Cambridge Level: KS4 Subject: Vocational First Teaching: September 2017 First Exam: June 2018 Help students build knowledge and prepare for assessment with this essential classroom resource - the only textbook tailored to

the Award, Certificate and Diploma for the Cambridge National Level 1/2 in Health and Social Care. Using careful language, a colourful design and straightforward navigation, our author team will develop your students' knowledge and understanding of theory and practice in the health and social care sector. Advice is given to help students understand the format of internal assessments, and practice questions are provided for help with unit R021. - Develops knowledge and skills for assessment with detailed guidance on assessment criteria and practice questions. - Contextualises knowledge with quizzes and case studies throughout. - Engages students and encourages interactive learning with group activities, stretch and challenge, research tasks and classroom discussion topics - Covers every unit of the specification, allowing you to deliver a flexible combination of optional units.

The Object Technology Revolution

*A Wiley-QED Publication The Object Technology Revolution answers all your basic questions about object technology and explains how and why this new approach to computing is so well-suited to the decentralized, lean-and-hungry business environment of the 1990s.

Ballweg's Physician Assistant: A Guide to Clinical Practice - E-Book

Elsevier Health Sciences Designed as a highly visual and practical resource to be used across the spectrum of lifelong learning, Ballweg's Physician Assistant, 7th Edition, helps you master all the core competencies needed for physician assistant certification, recertification, and clinical practice. It remains the only textbook that covers all aspects of the physician assistant profession, the PA curriculum, and the PA's role in clinical practice. Ideal for both students and practicing PAs, it features a succinct, bulleted writing style, convenient tables, practical case studies, and clinical application questions that enable you to master key concepts and clinical applications. Addresses all six physician assistant competencies, as well as providing guidance for the newly graduated PA entering practice. Includes five new chapters: What Is a Physician Assistant, and How Did We Get Here?, Effective Use of Technology for Patient-Centered Care, Success in the Clinical Year, Transitioning to Practice and Working in Teams, and Finding Your Niche. Features an enhanced focus on content unique to the PA profession that is not readily found in other resources, more illustrations for today's visually oriented learners, a more consistent format throughout, and a new emphasis on the appropriate use of social media among healthcare professionals. Provides updated content throughout to reflect the needs of the PA profession, including new content on self-care for the PA to help prevent burnout, suicide, and other hazards faced by healthcare professionals. Guides students in preparation for each core clinical rotation and common electives, as well as working with special patient populations such as patients experiencing homelessness and patients with disabilities. Includes quick-use resources, such as objectives and key points sections for each chapter, tip boxes with useful advice,

abundant tables and images, and more than 130 updated case studies. Evolve Educator site with an image bank is available to instructors through their Elsevier sales rep or via request at https://evolve.elsevier.com.

Interpersonal Communication

Relating to Others

Prentice Hall An update of a college-level text, first published in 1996, addressing concepts and methods for improving communication through study of the self, language, nonverbal communication, conflict management, and communication with family, friends, lovers, and colleagues. Annotation c. by Book News, Inc.,

Virtual Coach, Virtual Mentor

IAP In the case of virtual coaching and mentoring (or e-mentoring and ecoaching; or coaching/mentoring by wire—choose your own preferred nomenclature!) there are hundreds, perhaps thousands of programs and initiatives across the world. Yet there is comparatively little in the way of comparison of good practice or academic evaluation of what does and doesn't work. We found numerous individual case studies but a dearth of empirical research and no significant collection of cases to illustrate the diversity of applications. Virtual Coach, Virtual Mentor provides a wide variety of perspectives on a rapidly growing phenomenon. We hope and intend that it should make a timely and significant contribution to good practice and to encouraging more practitioners and their clients and more organizations to experiment with using electronic media to enrich coaching and mentoring. The view of ecoaching and e-mentoring is firmly one that these new media are less a replacement for traditional face-to-face than an enhancement of learning alliances in general. We see no evidence of fewer face-to-face coaching or mentoring relationships—on the contrary, they continue to become more popular and widespread. Rather, we see that virtual coaching and mentoring both enrich predominantly face-to-face relationships, by connecting partners at times between formal meetings, and open up coaching and mentoring to new audiences and new applications.

Patient Centered Care in Medical Imaging and Radiotherapy

Elsevier Health Sciences Health investigation and treatment have moved from a clinician-centred approach to a patient-centred approach during the past few decades. Patients are now rightly regarded as empowered and informed users of health services, not passive recipients. Motivated by this philosophical shift, this new book identifies the key issues underpinning the complete delivery of 'good' patient care and considers their application in the medical radiation sciences. Taking a

UK/European perspective, the authors examine how a holistic approach is related to legislation, human rights and perceived patient needs. Medical imaging and radiotherapy are front line services experienced by vast numbers of patients with acute and chronic medical conditions, including trauma and cancer. The book includes coverage of behavioural science and health psychology together with practical applications such as safe manual handling, infection control and radiation safety. This provides the reader with a comprehensive understanding of what contributes to the patient's experience in diagnostic imaging and radiotherapy. It also considers other aspects of the patient experience, such as inter-professional team working, disability, communication, clinical procedures and practice.
