
Download File PDF Pdf Drummond Henry By Man Of Ascent

Getting the books **Pdf Drummond Henry By Man Of Ascent** now is not type of challenging means. You could not forlorn going past book accrual or library or borrowing from your friends to way in them. This is an totally simple means to specifically get lead by on-line. This online pronouncement Pdf Drummond Henry By Man Of Ascent can be one of the options to accompany you behind having supplementary time.

It will not waste your time. resign yourself to me, the e-book will definitely spread you additional thing to read. Just invest little get older to admittance this on-line proclamation **Pdf Drummond Henry By Man Of Ascent** as competently as review them wherever you are now.

KEY=BY - CLARENCE LOGAN

The Ascent Of Man

[Jazybee Verlag](#) Though its stand-point is Evolution and its subject Man, this book is far from being designed to prove that Man has relations, compromising or otherwise, with lower animals. Its theme is Ascent, not Descent. It is a History, not an Argument. And Evolution, in the narrow sense in which it is often used when applied to Man, plays little part in the drama outlined here. So far as the general scheme of Evolution is introduced--and in the Introduction and elsewhere this is done at length --the object is the important one of pointing out how its nature has been misconceived, indeed how its greatest factor has been overlooked in almost all contemporary scientific thinking.

Pro Communione

Theological Essays on the Anglican Covenant

[Wipf and Stock Publishers](#) The proposed Anglican Covenant impinges not only upon the future of the Anglican Communion but upon global Christianity as well. **Pro Communione: Theological Essays on the Anglican Covenant** is the first volume that considers the completed text of the Covenant and its congruity with the Anglican tradition. Contributors across the Anglo-American world appraise the Covenant within a holistic framework defined by liturgical, historical, and ecumenical perspectives. These essays transcend current debates by illuminating abiding theological themes within Anglicanism. Creative and edifying, rigorous and hopeful, **Pro Communione** envisions a revival of the Anglican imagination within the context of a covenanted Anglican Communion. Contributors: Jeff Boldt, Augustine Casiday, Neil Dhingra, Andrew Goddard, Benjamin M. Guyer, N. J. A. Humphrey, Nathan G. Jennings, Evan Kuehn, Edmund Newey, Matthew S. C. Olver, Ephraim Radner, and Christopher Wells

A Prophetic Voice--David Smith Cairns (1862-1946)

An Intellectual Biography of One of Scotland's Leading Theologians and Ecclesiastical Figures in the Early Twentieth Century

[Wipf and Stock Publishers](#) This biography provides an exploration of the formative influences, development, and impact of the theology of David Smith Cairns, Scottish minister, academic, and writer, during the high point of British imperial expansion, and at a time of social tension caused by industrialization. It describes and evaluates his role in the Church's efforts to face major challenges relating to its relationships to the different world religions, its response to the First World War, and its attitude to the scientific disciplines that called into question some of its longstanding perceptions and suppositions. An eminent figure, born into the United Presbyterian Church and rooted in the Church in Scotland, Cairns operated ecumenically and internationally. His apologetics challenged the prevailing assumptions of the day: that science provided the only intellectually legitimate means of exploring the world, and that scientific determinism ruled out the Christian conception of the world as governed by providence. A major feature of his theology was the presentation of Christianity as a "reasonable" faith, and throughout his life he maintained a particular concern for young people, having endured his own crisis of faith when a student in Edinburgh. He enjoyed a decades-long involvement with the World Student Christian Federation, based on a mutually enriching relationship with one of its leading figures, the renowned American evangelist John Raleigh Mott.

"Beautiful Thoughts"

The Greatest Thing in the World

An Address

Asian Religious Responses to Darwinism

Evolutionary Theories in Middle Eastern, South Asian, and East Asian Cultural Contexts

[Springer Nature](#) This volume brings together diverse Asian religious perspectives to address critical issues in the encounter between tradition and modern western evolutionary thought. Such thought encompasses the biological theories of Charles Darwin, Jean-Baptiste Lamarck, Earnest Haeckel, Thomas Huxley, and later "neo-Darwinians," as well as the more sociological evolutionary theories of thinkers such as Herbert Spencer, Pyotr Kropotkin, and Henri Bergson. The essays in this volume cover responses from Hindu, Jain, Buddhist (Chinese, Japanese, and Indo-Tibetan), Confucian, Daoist, and Muslim traditions. These responses come from the decades immediately after publication of *The Origin of Species* up to the present, with attention being paid to earlier perspectives and teachings within a tradition that have affected responses to Darwinism and western evolutionary thought in general. The book focuses on three critical issues: the struggle for survival and the moral implications read into it; genetic variation and its seeming randomness as related to the problems of meaning and purpose; and the nature of humankind and human exceptionalism. Each essay deals with one or more of the three issues within the context of a specific tradition.

The Ascent of Man

[The Floating Press](#) Renowned German poet Mathilde Blind published several influential volumes of verse in the late nineteenth century. The epic poem *The Ascent of Man* is her most ambitious literary undertaking. In it, she provides a poetic account of Charles Darwin's theory of evolution. A relic from the era when the arts and sciences were more deeply intertwined, this fascinating work is a must-read for fans of Romantic poetry.

Machines as the Measure of Men

Science, Technology, and Ideologies of Western Dominance

[Cornell University Press](#) This new edition of what has become a standard account of Western expansion and technological dominance includes a new preface by the author that discusses how subsequent developments in gender and race studies, as well as global technology and politics, enter into conversation with his original arguments.

Through the Language Glass

Why The World Looks Different In Other Languages

[Random House](#) "Guy Deutscher is that rare beast, an academic who talks good sense about linguistics... he argues in a playful and provocative way, that our mother tongue does indeed affect how we think and, just as important, how we perceive the world." Observer *Does language reflect the culture of a society? *Is our mother-tongue a lens through which we perceive the world? *Can different languages lead their speakers to different thoughts? In *Through the Language Glass*, acclaimed author Guy Deutscher will convince you that, contrary to the fashionable academic consensus of today, the answer to all these questions is - yes. A delightful amalgam of cultural history and popular science, this book explores some of the most fascinating and controversial questions about language, culture and the human mind.

Encyclopedia of Sciences and Religions

[Springer](#) "To all who love the God with a 1000 names and respect science" In the last quarter century, the academic field of Science and Theology (Religion) has attracted scholars from a wide variety of disciplines. The question is, which disciplines are attracted and what do these disciplines have to contribute to the debate? In order to answer this question, the encyclopedia maps the (self)-identified disciplines and religious traditions that participate or might come to participate in the Science and Religion debate. This is done by letting each representative of a discipline and tradition answer specific chosen questions. They also need to identify the discipline in relation to the Science and Religion debate. Understandably representatives of several disciplines and traditions answered in the negative to this question. Nevertheless, they can still be important for the debate; indeed, scholars and scientists who work in the field of Science and Theology (Religion) may need knowledge beyond their own specific discipline. Therefore the encyclopedia also includes what are called general entries. Such entries may explain specific theories, methods, and topics. The general aim is to provide a starting point for new lines of inquiry. It is an invitation for fresh perspectives on the possibilities for engagement between and across sciences (again which includes the social and human sciences) and religions and theology. This encyclopedia is a comprehensive reference work for scholars interested in the topic of 'Science and Religion.' It covers the widest spectrum possible of academic disciplines and religious traditions worldwide, with the intent of laying bare similarities and differences that naturally emerge within and across disciplines and religions today. The A-Z format throughout affords easy and user-friendly access to relevant information. Additionally, a systematic question-answer format across all Sciences and Religions entries affords efficient identification of specific points of agreement, conflict, and disinterest across and between sciences and religions. The extensive cross-referencing between key words, phrases, and technical language used in the entries facilitates easy searches. We trust that all of the entries have something of value for any interested reader. Anne L.C. Runehov and Lluís Oviedo

Comte de Gabalis

[Cosimo, Inc.](#) When you have been enrolled among the Children of the Philosophers... you will straightaway discover that the Elements are inhabited by most perfect beings. Unhappy Adam's sin has deprived his unfortunate posterity of all knowledge of these beings and all intercourse with them. [T]he Element of Fire... was not created to remain useless and empty. -from "Discourse II" Sir Edward Lytton's based his strange novel Zanon upon this esoteric work. Alexander Pope, in his dedication to The Rape of the Lock, sings its praises. But let the reader beware! This book "of hidden mystery and power" is not for the "gratification of a selfish intellectualism"! A classic of the occult, this philosophical treatise on the metaphysical secrets of the universe reveals the motives and magicks of the spirits known as Sylphs, Gnomes, Nymphs, and Salamanders. First published in Paris in 1670, this translation from the original French features extensive anonymous commentary, and is essential reading for anyone wishing to understand the history of paranormal seeking for the meaning of life. French writer and priest N. DE MONTFAUCON DE VILLARS (1635-1673) was an advocate of liberty and religious tolerance and an influential thinker in the natural sciences; his writings are said to have inspired Lamarck and Darwin.

Slavery and the British Country House

In 2007 English Heritage commissioned initial research into links with transatlantic slavery or its abolition amongst families who owned properties now in its care. This was part of the commitment by English Heritage to commemorate the bicentenary of the abolition of the British transatlantic slave trade with work that would make a real difference to our understanding of the historic environment in the longer term. The research findings and those of other scholars and heritage practitioners were presented at the 'Slavery and the British Country House' conference which brought together academics, heritage professionals, country house owners and community researchers from across Britain to explore how country houses might be reconsidered in the light of their slavery linkages and how such links have been and might be presented to visitors. Since then the conference papers have been updated and reworked into a cutting edge volume which represents the most current and comprehensive consideration of slavery and the British country house as yet undertaken.

Eighteen Years in the Khyber, 1879-1898

[London, J. Murray](#) Sir Robert Warburton (1842-99) was a British army officer who served for 18 years as the political officer, or warden, of the Khyber Pass, the most important of the mountain passes connecting Afghanistan and present-day Pakistan. He was born in Afghanistan, the son of a British officer and his wife, a noble Afghan woman who was the niece of Amir Dost Mohammad Khan. Warburton was educated in England, commissioned an officer, and served at posts in British India and in Abyssinia (present-day Ethiopia) before being appointed, in 1879, to his post in the Khyber. Home to the fiercely independent Pushtun Afridi people who resisted external control, the pass frequently had been blocked by the Afridis or by fighting among the hill tribes. Warburton is credited with keeping the frontier peaceful and the pass open, mainly through diplomacy rather than force. He drew upon his Afghan background and his fluent Persian and Pushto to gradually win the trust of tribesmen whose traditions made them deeply suspicious of outsiders. In August 1897, one month after Warburton's retirement, unrest broke out among the Afridis, who seized the pass and held it for several months. Warburton was called back into service and participated in the Tirah expedition of 1897-98, in which Anglo-Indian forces reopened the pass. Warburton was especially proud of the role played in the expedition by the Khyber Rifles, a paramilitary force recruited from Afridi tribesmen that he had raised and commanded. Eighteen Years in the Khyber, 1879-1898 is Warburton's account of his education and career. It touches upon virtually every individual and event that played a role in relations between Afghanistan and British India during the last quarter of the 19th century. Long in poor health, Warburton returned to England and died before the book was completed. Posthumously published, it is illustrated with a number of striking photographs and includes a detailed fold-out map of the Khyber.

The Story of My Life

[GENERAL PRESS](#) The Story of My Life is an autobiography by Helen Keller. It is the story of Helen Keller and her life as a deaf and blind girl, and her triumph over these tribulations. In the book, she reveals her frustration and rage over her condition. It details her educational achievements and her introduction to the world through her breakthrough into communication. The story was written by Helen Keller when she was just 22 years old. The Story of My Life is a tale of the courage and unbreakable will of Helen Keller. The book has been adapted into a television series, a Broadway play, a Hollywood feature film, and an Indian feature film.

God and the Folly of Faith

The Incompatibility of Science and Religion

[Prometheus Books](#) A thorough and hard-hitting critique that is a must read for anyone interested in the interaction between religion and science. It has become the prevalent view among sociologists, historians, and some theistic scientists that religion and science have never been in serious conflict. Some even claim that Christianity was responsible for the development of science. In a sweeping historical survey that begins with ancient Greek science and proceeds through the Renaissance and Enlightenment to contemporary advances in physics and cosmology, Stenger makes a convincing case that not only is this conclusion false, but Christianity actually held back the progress of science for one thousand years. It is significant, he notes, that the scientific revolution of the seventeenth century occurred only after the revolts against established ecclesiastic authorities in the Renaissance and Reformation opened up new avenues of thought. The author goes on to detail how religion and science are fundamentally incompatible in several areas: the origin of the universe and its physical parameters, the origin of complexity, holism versus reductionism, the nature of mind and consciousness, and the source of morality. In the end, Stenger is most troubled by the negative influence that organized religion often exerts on politics and society. He points out antiscientific attitudes embedded in popular religion that are being used to suppress scientific results on issues of global importance, such as overpopulation and environmental degradation. When religion fosters disrespect for science, it threatens the generations of humanity that will follow ours.

The Expedition of Humphry Clinker

[Cosimo, Inc.](#) Before I was born, [my aunt] had gone such lengths in the way of flirting with a recruiting officer, that her reputation was a little singed. She afterwards made advances to the curate of the parish...-from "To Sir Watkin Phillips, of Jesus college, Oxon, Bath, May 6" An often overlooked but nevertheless important name in the history of the English novel, Tobias Smollett greatly influenced Dickens, with his unsentimental depiction of poverty, and was a favorite of William Makepeace Thackeray, who called The Expedition of Humphry Clinker "the most laughable story that has ever been written since the goodly art of novel-writing began." An early example of the epistolary novel, consisting entirely of letters written between its characters, this is Smollett's last book, completed and published just before his death in 1771. Far less brutal than his earlier work, it is the comic story of Humphry Clinker, a poor lad who joins a touring party of aristocrats on their journey through city and country. Smollett's satire on the well-to-do and the fripperies that consumed their society echoes in countless writers who came after him, from Jane Austen to "Bridget Jones" with her diary. Scottish writer TOBIAS GEORGE SMOLLETT (1721-1771) trained as a surgeon but found far more success as a novelist; he also worked as an editor and translator. Among his works are Roderick Random (1748) and The Adventures of Peregrine Pickle (1751).

Overthrow

America's Century of Regime Change from Hawaii to Iraq

Macmillan A fast-paced narrative history of the coups, revolutions, and invasions by which the United States has toppled fourteen foreign governments -- not always to its own benefit "Regime change" did not begin with the administration of George W. Bush, but has been an integral part of U.S. foreign policy for more than one hundred years. Starting with the overthrow of the Hawaiian monarchy in 1893 and continuing through the Spanish-American War and the Cold War and into our own time, the United States has not hesitated to overthrow governments that stood in the way of its political and economic goals. The invasion of Iraq in 2003 is the latest, though perhaps not the last, example of the dangers inherent in these operations. In *Overthrow*, Stephen Kinzer tells the stories of the audacious politicians, spies, military commanders, and business executives who took it upon themselves to depose monarchs, presidents, and prime ministers. He also shows that the U.S. government has often pursued these operations without understanding the countries involved; as a result, many of them have had disastrous long-term consequences. In a compelling and provocative history that takes readers to fourteen countries, including Cuba, Iran, South Vietnam, Chile, and Iraq, Kinzer surveys modern American history from a new and often surprising perspective. "Detailed, passionate and convincing . . . [with] the pace and grip of a good thriller." -- Anatol Lieven, *The New York Times Book Review*

The Freedom of Peaceful Action

On the Origin of Individual Rights

Lexington Books The Nature of Liberty trilogy presents an ethical case for individual liberty, arguing from the philosophy of Ayn Rand and citing the findings of evolutionary psychology to demonstrate the compatibility between human nature and laissez-faire liberty. The first installment, *The Freedom of Peaceful Action*, makes the philosophic case that an approach starting from observational reason will indicate the practicality and ethical desirability of a free-market system based on rights.

Developing the Leader Within You

Thomas Nelson *Developing the Leader Within You* is Dr. Maxwell's first and most enduring leadership book, having sold more than one million copies. In this Christian Leaders Series edition of this Maxwell classic, you will discover the biblical foundation for leadership that John Maxwell has used as a pastor and business leader for more than forty years. These same principles and practices are available for everyday leaders in every walk of life. It is a lofty calling to lead a group—a family, a church, a nonprofit, a business—and the timeless principles in this book will bring positive change in your life and in the lives of those around you. You will learn: *The True Definition of Leader*. "Leadership is influence. That's it. Nothing more; nothing less." *The Traits of Leadership*. "Leadership is not an exclusive club for those who were 'born with it.' The traits that are the raw materials of leadership can be acquired. Link them up with desire, and nothing can keep you from becoming a leader." *The Difference Between Management and Leadership*. "Making sure the work is done by others is the accomplishment of a manager. Inspiring others to do better work is the accomplishment of a leader." God has called every believer to influence others, to be salt and light. *Developing the Leader Within You* will equip you to improve your leadership and inspire others.

The Secret Teachings of All Ages

DIGITAL FIRE Originally published in 1928, *The Secret Teachings of All Ages* is Manly P. Hall's celebrated 20th century tome, where readers delight in discussions about ancient symbolism, rituals, and mythology. Manly P. Hall was a Canadian Author of over 150 published works, the best known of which are *Initiates of the Flame*, *The Story of Healing*, *The Divine Art*, *Aliens Magic and Sorcery* *The Secret Teachings of All Ages*, and *An Encyclopedic Outline of Masonic, Hermetic, Qabbalistic Rosicrucian Symbolical Philosophy*. Symbolism is the language of the Mysteries; in fact it is the language not only of mysticism and philosophy but of all Nature, for every law and power active in universal procedure is manifested to the limited sense perceptions of man through the medium of symbol. Every form existing in the diversified sphere of being is symbolic of the divine activity by which it is produced. By symbols men have ever sought to communicate to each other those thoughts which transcend the limitations of language. This book is often hailed as an encyclopedia for all things hidden, ancient, and arcane, and it explores a vast array of topics, from secret societies and the Zodiac to Mystic Christianity and William Shakespeare's identity. Despite some of the outdated and controversial ideas it poses now in the 21st century, it continues to fascinate students of the cryptic and mysterious.

History of the Town of Greenock

The Passion for Souls

Palala Press This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. The Perfectibility of Man

Life of John Eadie

Who One Is

Book 1: Meontology of the "I": A Transcendental Phenomenology

Springer Science & Business Media Both volumes of this work have as their central concern to sort out who one is from what one is. In this Book 1, the focus is on transcendental-phenomenological ontology. When we refer to ourselves we refer both non-ascriptively in regard to non-propriety as well as ascriptively in regard to propriety aspects of ourselves. The latter is the richness of our personal being; the former is the essentially elusive central concern of this Book 1: I can be aware of myself and refer to myself without it being necessary to think of any third-personal characteristic; indeed one may be aware of oneself without having to be aware of anything except oneself. This consideration opens the door to basic issues in phenomenological ontology, such as identity, individuation, and substance. In our knowledge and love of Others we find symmetry with the first-person self-knowledge, both in its non-ascriptive forms as well as in its property-ascribing forms. Love properly has for its referent the Other as present through but beyond her properties. Transcendental-phenomenological reflections move us to consider paradoxes of the "transcendental person". For example, we contend with the unrepresentability in the transcendental first-person of our beginning or ending and the undeniable evidence for the beginning and ending of persons in our third-person experience. The basic distinction between oneself as non-sortal and as a person pervaded by properties serves as a hinge for reflecting on "the afterlife". This transcendental-phenomenological ontology of necessity deals with some themes of the philosophy of religion.

Some Experiences of a Barrister's Life

Natural Law in the Spiritual World

Good Press "Natural Law in the Spiritual World" by Henry Drummond. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten—or yet undiscovered gems—of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.

Mutual Aid

A Factor of Evolution

[Simon and Schuster](#) Written partly in response to Social Darwinism and in particular to Thomas H. Huxley's nineteenth-century essay, "The Struggle for Existence," Kropotkin's book drew on his experiences in scientific expeditions in Siberia to illustrate the phenomenon of cooperation. After examining the evidence of cooperation in nonhuman animals, pre-feudal societies, in medieval cities, and in modern times, he concludes that cooperation and mutual aid are the most important factors in the evolution of the species and the ability to survive.

The Changed Life

Christian Perspectives on Transhumanism and the Church

Chips in the Brain, Immortality, and the World of Tomorrow

[Springer](#) Christians have always been concerned with enhancement—now they are faced with significant questions about how technology can help or harm genuine spiritual transformation. What makes traditional and technological enhancement different from each other? Are there theological insights and spiritual practices that can help Christians face the challenge of living in a technological world without being dangerously conformed to its values? This book calls on Christians to understand and engage the deep issues facing the church in a technological, transhumanist future.

The Black Atlantic

Modernity and Double Consciousness

[Verso Books](#) This text sketches a critical account of the location of black intellectuals in the modern world following the end of racial slavery. The book explores the reactions of black writers to modernity's colour-coded promises, demonstrating the value of a politicized post-modernism in re-reading black cultural politics and political culture. The lives and writings of key African Americans such as Martin Delany, W.E.B. DuBois, Frederick Douglas and Richard Wright are examined in the light of their experiences outside the US in Europe and Africa. Gilroy provides an extensive discussion of black vernacular cultures, especially music.

Origines Parochiales Scotiae

The Antiquities Ecclesiastical and Territorial of the Parishes of Scotland

Every Man in His Humour

A Comedy

The Evolution of Institutional Economics

Agency, Structure, and Darwinism in American Institutionalism

[Psychology Press](#) The story of American Institutional Economics, from its foundations through its supremacy and subsequent decline is an extremely interesting one. Today with the return of Darwinian ideas to social sciences, changes in psychology and a revival of pragmatist philosophy, the intellectual conditions for a revival and reconstruction of American Institutionalism are arguably in place. Few are better qualified to provide an authoritative, wide-ranging account of the rise, fall and potential rebirth of institutional economics than Geoffrey Hodgson. This well-written comprehensive study offers an interpretation of Veblen and American Institutionalism that places Darwinism at the center. In this and other aspects, it challenges prevailing accounts of the nature and potential of American Institutionalism. The author's position as one of the most important economists in the world is becoming cemented by his marvelous history of important books. This book will only add to his status. The book will be read and re-read by academics and students economics, philosophy and sociology.

Corcoran Gallery of Art

American Paintings to 1945

[Hudson Hills Press](#) This authoritative catalogue of the Corcoran Gallery of Art's renowned collection of pre-1945 American paintings will greatly enhance scholarly and public understanding of one of the finest and most important collections of historic American art in the world. Composed of more than 600 objects dating from 1740 to 1945.

Hobson-Jobson

Being a Glossary of Anglo-Indian Colloquial Words and Phrases and of Kindred Terms Etymological, Historical, Geographical and Discursive

London : J. Murray

Toronto of Old

Collections and Recollections Illustrative of the Early Settlement and Social Life of the Capital of Ontario

Evolution

Ein interdisziplinäres Handbuch

[Springer-Verlag](#) Wichtigste wissenschaftliche Theorie der Moderne. Darwins Evolutionstheorie revolutionierte nicht nur die Biologie, sondern beeinflusst bis heute alle Wissensbereiche und wird nach wie vor kontrovers diskutiert. Das Handbuch bietet erstmals einen umfassenden Überblick über den gegenwärtigen Stand der Debatten. Es schildert ausführlich die Geschichte der Evolutionstheorie und geht auf ihre wissenschaftlichen Praktiken, Repräsentationsweisen und zentralen Begriffe ein. Zudem dokumentiert es ihre Rezeption in den Wissenschaften und ihren Einfluss auf Gesellschaft und Kunst.

The Wallace

Selections

ISD LLC The Wallace catalogs the sheer brutality of war. We are regaled with such detailed accounts of the sacking of towns and the burning down of buildings full of screaming inhabitants that the smells and sounds, as well as the terrible sights, of war are graphically conveyed in language which seems designed not only to express Wallace's rage and Hary's antipathy but also to incite hatred of the English in his readers.
