characteristic of unequal societies in transformation. It highlights robust indigenous pathways and resilience responses used by elders and young people in urban and rural settings in challenging Southern African settings (South Africa, Namibia, Lesotho and Swaziland) to explain an Indigenous Psychology theory. Flocking (rather than fighting, fleeing, freezing or fainting) is explained as a default collectivist, collaborative and pragmatic social innovation to provide communal care and support when resources are constrained, and needs are par for the course. Flocking is used to address, amongst others, climate change (drought and energy use in particular), lack of household income and securing livelihoods, food and nutrition, chronic disease (specifically HIV / AIDS and tuberculosis), barriers to access services (education, healthcare, social welfare support), as well as leisure and wellbeing. The book further deliberates whether the continued use of such an entrenched socio-cultural response mollifies citizens and decision-makers into accepting inequality, or whether it could also be used to spark citizen agency and disrupt longstanding structural disparities. **Psychology: A Journey Cengage Learning** A psychology text that you'll actually want to read! **PSYCHOLOGY: A JOURNEY** is guaranteed to spark your curiosity, insight, imagination, and interest. It comes as no surprise, then, that "counselor impairment" - the stress that comes from treating survivors of traumatic events - is now officially recognized by the American Counseling Associations' Task Force on Counselor Wellness. "Empathy Fatigue" is a term coined by the author after his own experience serving on the crisis response team for the Westside Middle School shootings in Jonesboro, Arkansas. Remarkably, symptoms of empathy fatigue are evident amongst a broad range of professionals: those who treat victims of stressful and traumatic events; those who treat persons with abuse, mood, anxiety, and stress-related disorders; as well as those who work in career and vocational settings or with people with mental and physical disabilities. This guide is also meant for all these groups. This book provides a repertoire of strategies, techniques, and insight designed to increase personal resiliency and decrease counselor burnout and fatigue: Self-assessment approaches, with an in-depth analysis of empathy fatigue and an explanation of this phenomenon from a mind, body, and spiritual perspective. Detailed case studies and suggested questions for self-assessments and self-care.
