Raghee Horner has successfully traded in the forex market for over a decade, and now, in *Thirty Days of Forex Trading*, she shares her experiences in this field by chronicling one full month of trading real money. First, Horner introduces you to the tools of the forex trade, and then she moves on to show you exactly what she does, day after day, to find potentially profitable opportunities in the forex market. Trading The Forex Market - Repeating Setups That Beat Your Broker Are you tired of forex trading courses, forex strategies, forex trading systems and books that don't really teach you how to trade and make money? This book does not waste your time with boring stories and basic, general information just to fill up pages! "Trading The Forex Market - Repeating Setups That Beat Your Broker", is a complete comprehensive forex trading guide that's suited for all experience levels & covers all of the important aspects you need to succeed. Whether you trade short term or longer term, these forex trading strategies will turn your trading around to profitability very quickly. The forex market has repeatable setups that happen over & over, that is the foundation of the strategies. These favorable price action setups are also combined with specific indicators & candle patterns that all work very well at confirming each other. There is absolutely no silly stuff in the course such as "magical theories" and page after page of useless information. These techniques and this forex trading education will have you trading like a true professional and develop your trading mind around the WHOLE trade, so you will become a trader, not just a strategy user! Many forex traders use too many indicators and rely solely on them, this is a big mistake and contributes to most of your losses. The reason is that the indicators were not created for 24 hour trading like the forex market, and because they need to be combined with other techniques such as price action because they lag behind price. This forex trading course will show you how to use only a handful of indicators & put your efforts into spotting the repeatable setups that are right in front of you all the time. That's where the big money is. From scalping the forex market to trading medium & longer term, you're covered. The EUR/USD trade using the United States Dollar Index as the entry and the Ultimate Moving Average Play are two of the forex strategy highlights in the course. They allow you to profit thousands of pips a year! Good forex strategies are only a small part of the forex trading game and this course. Without proper forex trading education, money management & overall trade management, the best forex strategies will do you absolutely no good at all! Sections on management of your money & trades are included & will teach you how to keep losses to a minimum of 1%-3% no matter the size of your account. You will also learn techniques on how to form timely exit opinions for any forex strategy which is very important & has the biggest impact on your

trading success along with proper trade management. Exits are not talked about a lot in the forex market for some reason, everyone is only interested in strategies. This is another big mistake traders make, but this forex trading guide covers that & a whole lot more making it possible for you to become an all around excellent trader. The author Larry Palmer, is an experienced trader who started his career in the stock market and has taught his forex trading techniques and money/trade management guidelines to traders from all around the world. Do you want to learn how to earn money with Forex Trading? If yes, then keep reading. Foreign exchange, most commonly known as Forex, refers to the buying and selling of currencies to make a profit off the fluctuations in their value. Forex can also be simply described as the process of exchanging currencies. There are many reasons as to why you would exchange your currency for another. It may be for commercial reasons, trading reasons, or tourism purposes. However, the main reason why currencies are exchanged is to make a profit out of it. As different currencies get converted every day, some currencies experience price movements in an extremely volatile manner. While this volatility increases the risks of conducting forex trade, traders are highly

attracted to it, as it also brings about a greater chance of earning high profits. Forex is unique because it has no central marketplace where the exchange takes place. There is not one centralized exchange center, but rather, the trade is conducted in an electronic manner over-the-counter (OTC). This, means that all forex transactions are carried out through computer networks and electronic trading platforms interconnecting all forex traders around the world. The forex market actively operates 24 hours a day 365 days a year. Currencies in foreign exchange are traded across all the time zones in the major financial centers in the world. Such a trading system means that when the trading day in the US ends, a forex trader based in the US can begin a new trading day on the Hong Kong or Tokyo market for example. This is what causes the price quotes of the forex market to change constantly. In some way Forex Trading Strategies are similar to those adopted by traders on the stock market. A trader will have to critically think about where the value of a given currency stands and where it is heading to. The biggest difference, however, lies in the fact that with Forex, it very easy to trade down or up. For instance, if you think that the value of a currency will increase, you proceed to buy it. On the other hand, if you feel that it will depreciate, you will sell it. Today's globalized market is vast, making it easy to find a buyer or a seller. Are you interested? boss the eff out? Even if you're your own boss? I have. I remember the day I decided to punch my boss in the face. One of the best decisions I ever made by far. It was glorious. A "V" day of sorts. I just walked in his office, looked him straight in the eyes, and did a spinning back fist. Yeah, that's right ... a spinning back fist. Bruce Lee style, baby. I missed of course. And fell. But nevertheless ... my point had been made. I picked myself back up off the floor, slotted back to my cubic-hell, and resumed my daily torchores like a good little drone. And then I woke up. Literally. Like ... in a bed. I was just a stupid dream. "Man", I thought. "If I can't even punch my boss the right way in my dreams, how the heck am I ever gonna do it in real life?" So I decided to do what every sensible human being does in his mid-thirties ... give up on my dreams. Luckily for me I had two dreams. One was to punch my boss in the face. The other was to quit my job and get filthy rich doing stuff that made me happy. Swing-and-a-miss on the first dream (pun intended). Home run on the second one. Like ... grand slam home run. I wanna tell you both how I did it and how you can be one of my "RBI"s. I've done all the hard work for you. All you have to do is quit your job and come on home. Here's my point ... You can have and do whatever the heck you want. You can, to a certain degree, create your own reality. But it's not easy. Which is why I've decided to create your reality for you. Wanna see it? Step into it even? You would if you knew what was on the other side. All ya gotta do is punch a few buttons and get this book. But you're going to have to take a click of faith. **Forex for Beginners The Basics of Forex Trading to Earn Every Day with Simple Strategies Tips and Tricks Exploiting Also the Market Swing Using the Right Psychology, Discipline and Money Management** Would you like to learn how to earn your first dollar with forex trading? One that has international exposure? High liquidity? Low-margin requirements? Smaller contracts suitable for smaller accounts? Low-cost transaction fees? Stable market prices? Predictable price movement? No directional bias? Offer the ability to go long or short with uptick requirements? No limit up or limit down rules like in the futures market? The ability to trade around the clock to match your schedule? Offer a wide variety of instruments to trade? The Forex offers all of those things and more. Each day, more than \$3 trillion US dollars worth of currencies are traded daily on the Forex across the globe, round the clock. The Forex never sleeps and offers dozens of currency pairs to trade round the clock. Never before has a market been so open and transparent to Forex trading beginners or to veteran traders than in the 21st century Forex market. But, even while offering so much, forex trading for beginners can be a frustrating experience if you don't understand what makes the Forex tick. Especially if you lack reliable Forex trading strategies which can put yourself at unnecessary risk. For example, while Forex price action is considered more stable than the equity markets, you have to understand the impact of international economic reports in Forex trading. Then, you also have to know how to navigate around the games that are played with these reports. Insiders "leak" news concerning these reports to stir up Forex price action since there is no insider trading rules in the Forex. If you understand these nuances up front before you try your hand at Forex trading then you're less likely to fall for these head-fakes and feints by the insiders and suffer unnecessary losses. Better yet, if you have an arsenal of Forex trading tools then you'll be able to look at the price action taking place and easily determine the trend and where you're entry and exit points are before you ever take a position. Whether you prefer Forex scalping to

swing trading or taking longer-term positions, the ability to read price action, combine effective technical indicators, and have a plan in place to control risk and maximize your profits is critical to the path of profitability in Forex trading. In the following chapters and pages, you'll learn: - What the key economic indicators are (and how to use them). - Why it's important to diversify your trading strategies. - A 5-step plan to maintain discipline in your trades. - What Ichinioku Clouds are and how to spot trading opportunities with them. - Comprehensive risk strategies to help insulate yourself from loss. - How to protect yourself from fraud. - How to use pivot points to spot "invisible" support and resistance levels. - The four types of price gaps to watch for and how to profit with them. - How to "ride" momentum to higher profits. - Where the financial epicenter of Forex volume is located (and it's not in the U.S.). - How to combine the 20-day EMA and MACD into a formidable trading strategy. - Don't have alot of money? Welcome to the world of Forex Mini-Accounts. - How to read price action with candlestick patterns. - Keep your emotions in check (not knowing this can lead to sleepless nights). - Technical price patterns and what to watch for, and what to ignore. - How to combine price action, indicators, and technical patterns to form bullet-proof trading strategies.
