### TOOLS FOR BUSINESS DECISION MAKING

---

---

*John Wiley & Sons* **Financial Accounting: Tools for Business Decision Making** by Paul Kimmel, Jerry Weygandt, and Jill Mitchell provides a practical introduction to financial accounting with a focus on how to use accounting information to make business decisions. Through significant course updates, the 10th Edition presents an active, hands-on approach to spark efficient and effective learning and develops the necessary skills to inspire and prepare students to be the accounting and business professionals of tomorrow. To ensure maximum understanding, students work through integrated assessment at different levels of difficulty right at the point of learning. The course's varied assessment also presents homework and assessment within real-world contexts to help students understand the why and the how of accounting information and business application. Throughout the course, students also work through various hands-on activities including Cookie Creations Cases, Expand Your Critical Thinking Questions, Excel Templates, and Analytics in Action problems, all within the accounting context. These applications all map to chapter material, making it easier for instructors to determine where and how to incorporate key skill development in their syllabus. With **Financial Accounting**, students will understand the foundations of financial accounting and develop the necessary tools for business decision-making, no matter what path they take.

*John Wiley & Sons* "Introduction to Financial Statements Knowing the numbers is sometimes even a matter of corporate survival. Consider the story of Columbia Sportswear Company, headquartered in Portland, Oregon. Gert Boyle's family fled Nazi Germany when she was 13 years old and then purchased a small hat company in Oregon, Columbia Hat Company. In 1971, Gert's husband, who was then running the company, died suddenly. Gert took over the small, struggling company with help from her son Tim, who was then a senior at the University of Oregon. Somehow, they kept the company afloat. Today, Columbia has more than 4,000 employees and annual sales in excess of \$1 billion. Its brands include Columbia, Mountain Hardwear, Sorel, and Montrail. Employers such as Columbia Sportswear generally assume that managers in all areas of the company are "financially literate." To help prepare you for that, in this text

you will learn how to read and prepare financial statements, and how to use key tools to evaluate financial results using basic data analytics."--

## THE DECISION MODEL

---

---

### A BUSINESS LOGIC FRAMEWORK LINKING BUSINESS AND TECHNOLOGY

---

*CRC Press* In the current fast-paced and constantly changing business environment, it is more important than ever for organizations to be agile, monitor business performance, and meet with increasingly stringent compliance requirements. Written by pioneering consultants and bestselling authors with track records of international success, **The Decision Model: A Business Logic Framework Linking Business and Technology** provides a platform for rethinking how to view, design, execute, and govern business logic. The book explains how to implement the Decision Model, a stable, rigorous model of core business logic that informs current and emerging technology. The authors supply a strong theoretical foundation, while succinctly defining the path needed to incorporate agile and iterative techniques for developing a model that will be the cornerstone for continual growth. Because the book introduces a new model with tentacles in many disciplines, it is divided into three sections: Section 1: A Complete overview of the Decision Model and its place in the business and technology world Section 2: A Detailed treatment of the foundation of the Decision Model and a formal definition of the Model Section 3: Specialized topics of interest on the Decision Model, including both business and technical issues The Decision Model provides a framework for organizing business rules into well-formed decision-based structures that are predictable, stable, maintainable, and normalized. More than this, the Decision Model directly correlates business logic to the business drivers behind it, allowing it to be used as a lever for meeting changing business objectives and marketplace demands. This book not only defines the Decision Model and but also demonstrates how it can be used to organize decision structures for maximum stability, agility, and technology independence and provide input into automation design.
